# pfRICH prototyping schedule

➢ Assumptions

    ➢ We are getting aerogel in time (and perform a proper QA on it)

    ➢ We are getting HRPPDs in time (and make sure they work)

    ➢ We are building HGCROC ASIC backplane in time

    ➢ Mirrors are available in time (and QA shows they are ok)

    ➢ Vessel parts become available for assembly by April 1, 2024

    ➢ "Ready for shipment" state: May,1 2024

   ➢ We are actually getting beam time at Fermilab starting from the 2-d week of May 2024

Schedule overview

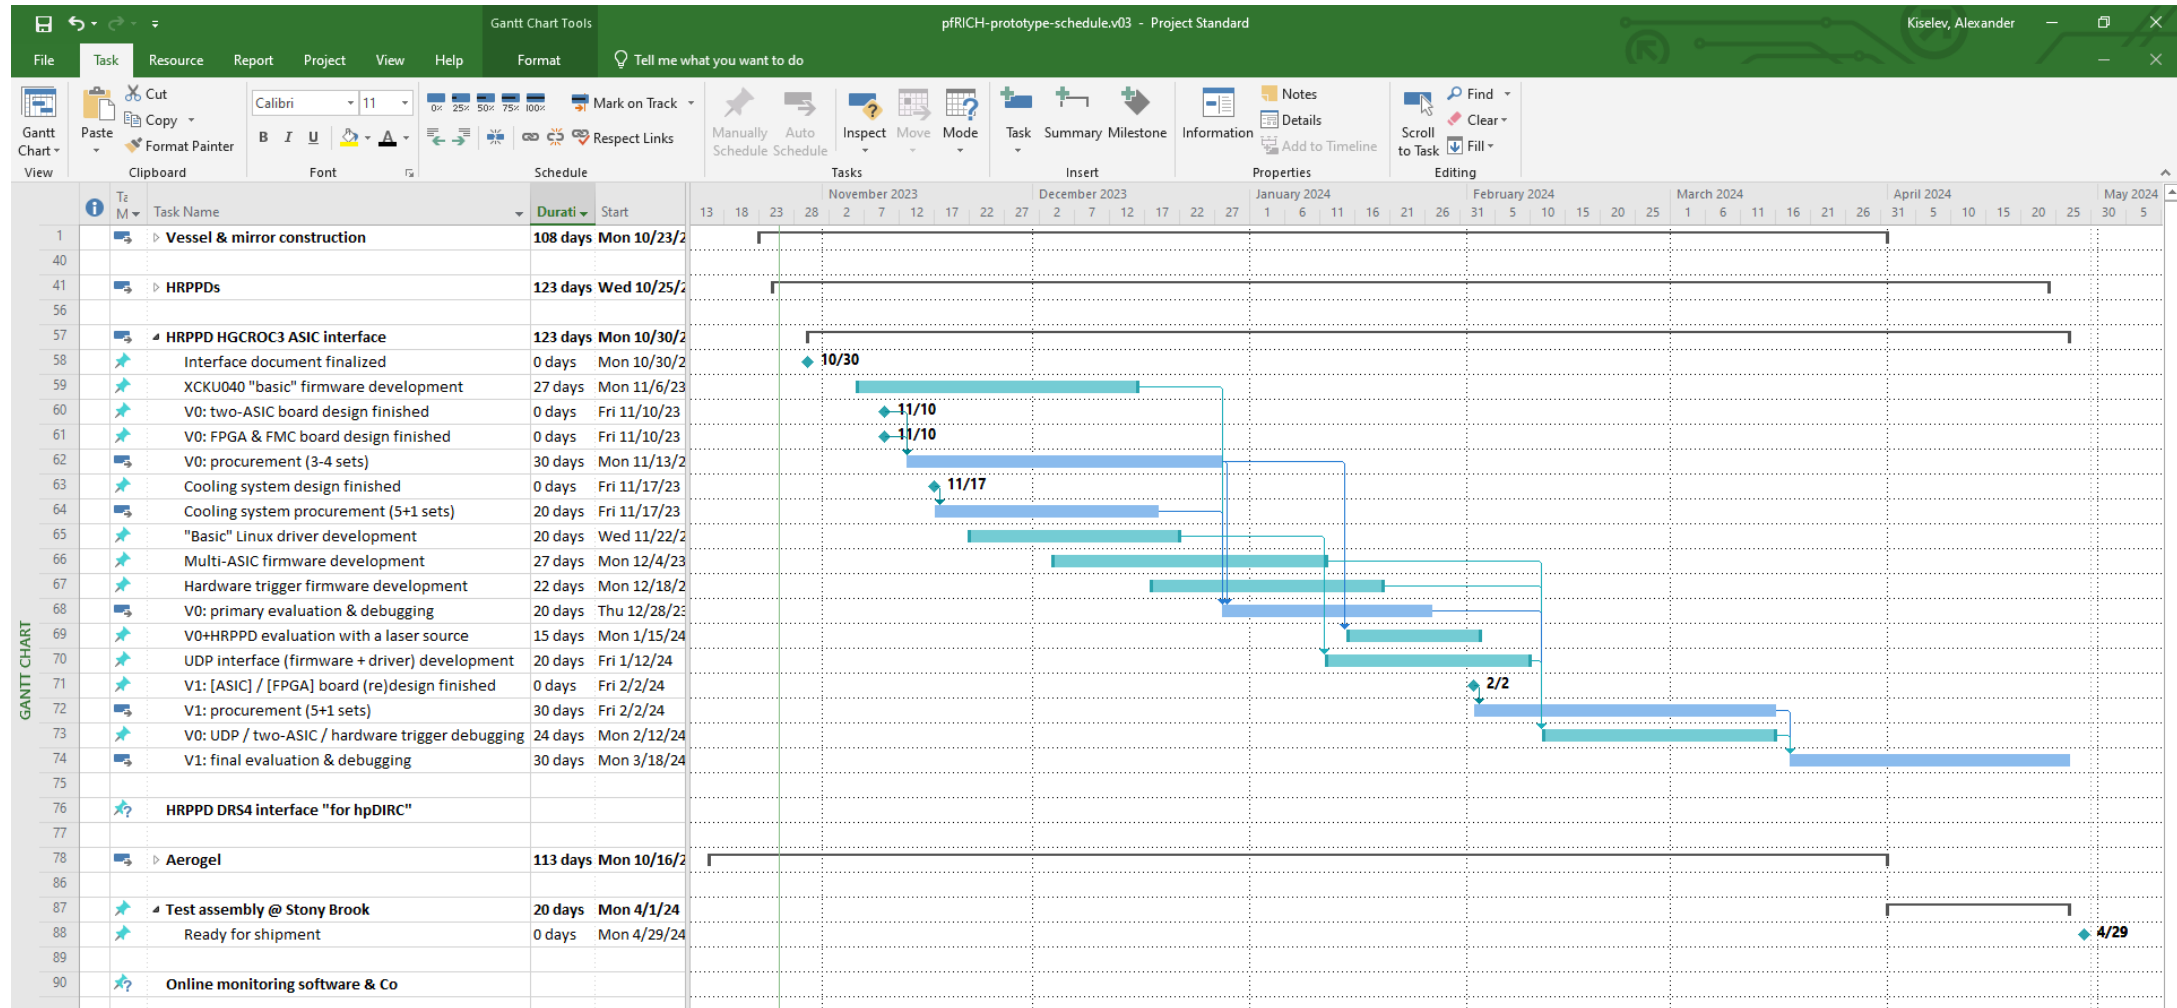

Software requires a separate discussion

> ➢ Non-binding internal document
>> ➢ Activities, milestones, names (?), progress, no $$ numbers
>> ➢ Activities: everything from HRPPDs to Monte-Carlo relevant for beam test data analysis
> ➢ Will be publicly available for everyone (read-only)

Example #1: HRPPDs

➤ Confirmed by Incom yesterday

Example #2: ASIC / FPGA backplane

➢ Confirmed by OMEGA and Uni Debrecen today

➢ (Up to small modifications)
