

Recent Updates

- Added new parallel computing branch to **epic-analysis**
 - https://github.com/eic/epic-analysis/tree/hpc_rework
 - Creates an independent analysis pipeline that runs entirely on the farm
 - For any simulation campaign, run the full reconstruction of *each energy config, each Q2 range*, through analysis macros (~1 hour)
- Fixed Q2weighting issues
 - Nontrivial reweighting solution when splitting into multiple jobs
 - Beam crossing \rightarrow trueQ2 changes
- Sent Marco and Alessandro π^+/π^- (x,Q2,z,pT) 4d rates w/ experimental luminosities
