

Next Computing and Physics Discussion

- Next Computing and Physics Discussion will be held 11 am ET Wednesday March 13th
- PWGs will report on analysis performance:
 - How well are the software tools performing?
 - Are the generator statistics/choices sufficient?
 - Is there anything else needed for the successful completion of the TDR analyses?
 - Construction feedback in a joint forum will be important to our success
- If possible, report on the analysis performance for the PID LUT or electron finder
