

EIC@BNL Group Meeting

January 25, 2024

Time of Meeting

- Currently 13:30
- Request (Dave) to move to 14:00 to avoid conflict with other meeting
- Known conflicts:
 - ▶ pfRICH toggles between 12:00 and 15:00. 15:00 is too tight.

Agenda

- Membership Policy (20 min)

- ▶ membership committee chaired by Peter and Pietro
- ▶ request for input, ideas, suggestions
- ▶ Note, BNL is in strange situation with many *potential* active ePIC member in the future but limited efforts at the moment
- ▶ Peter will chair discussion

- ePIC Detector efforts

- ▶ BNL has large physics department (NP) and we want to stay that way
- ▶ We have to take on more projects to remain relevant in future (EIC)
- ▶ Currently: pfRICH (PO), lumi/polarimetry (PO/Project), far-fwd (Project)
- ▶ Potential: DAQ, SVT, ToF
- ▶ Not an option: Backward HCal (better for U. groups, funding? physics case?)
- ▶ Minor limited efforts: Peter in Fwd-HCal software, Brian in Bckwd-HCal simulations
- ▶ Will hear today on above (except pfRICH). Might not be able to cover all then continue next week
