Dear all,

As was suggested during the previous [TIC meeting on Jan22](#) , I have compiled the Rad-Hard information in the following spread sheet.

<https://docs.google.com/spreadsheets/d/1UYziWHSnIld3PrRacGNvZC6II4SQBDEsDmlyTJki2u8/edit?usp=sharing>

There are different tabs for each subsystem with the information I could grab from the slides during [TIC meeting on Dec 11, 2023](#)

For quite a few systems, the information wasn't available or not clear/complete to me.

I would request you all to please have a look and fill out the blanks in this spreadsheet.

Of course please feel free to correct/add any information already there.

ePIC's Radiation Doses and Particle Fluence can be found at: [Wiki](#)

It would be much appreciated if we could fill it out by the end of the coming week.

Thanks

Prakhar
