sPHENIX INTT stability monitor
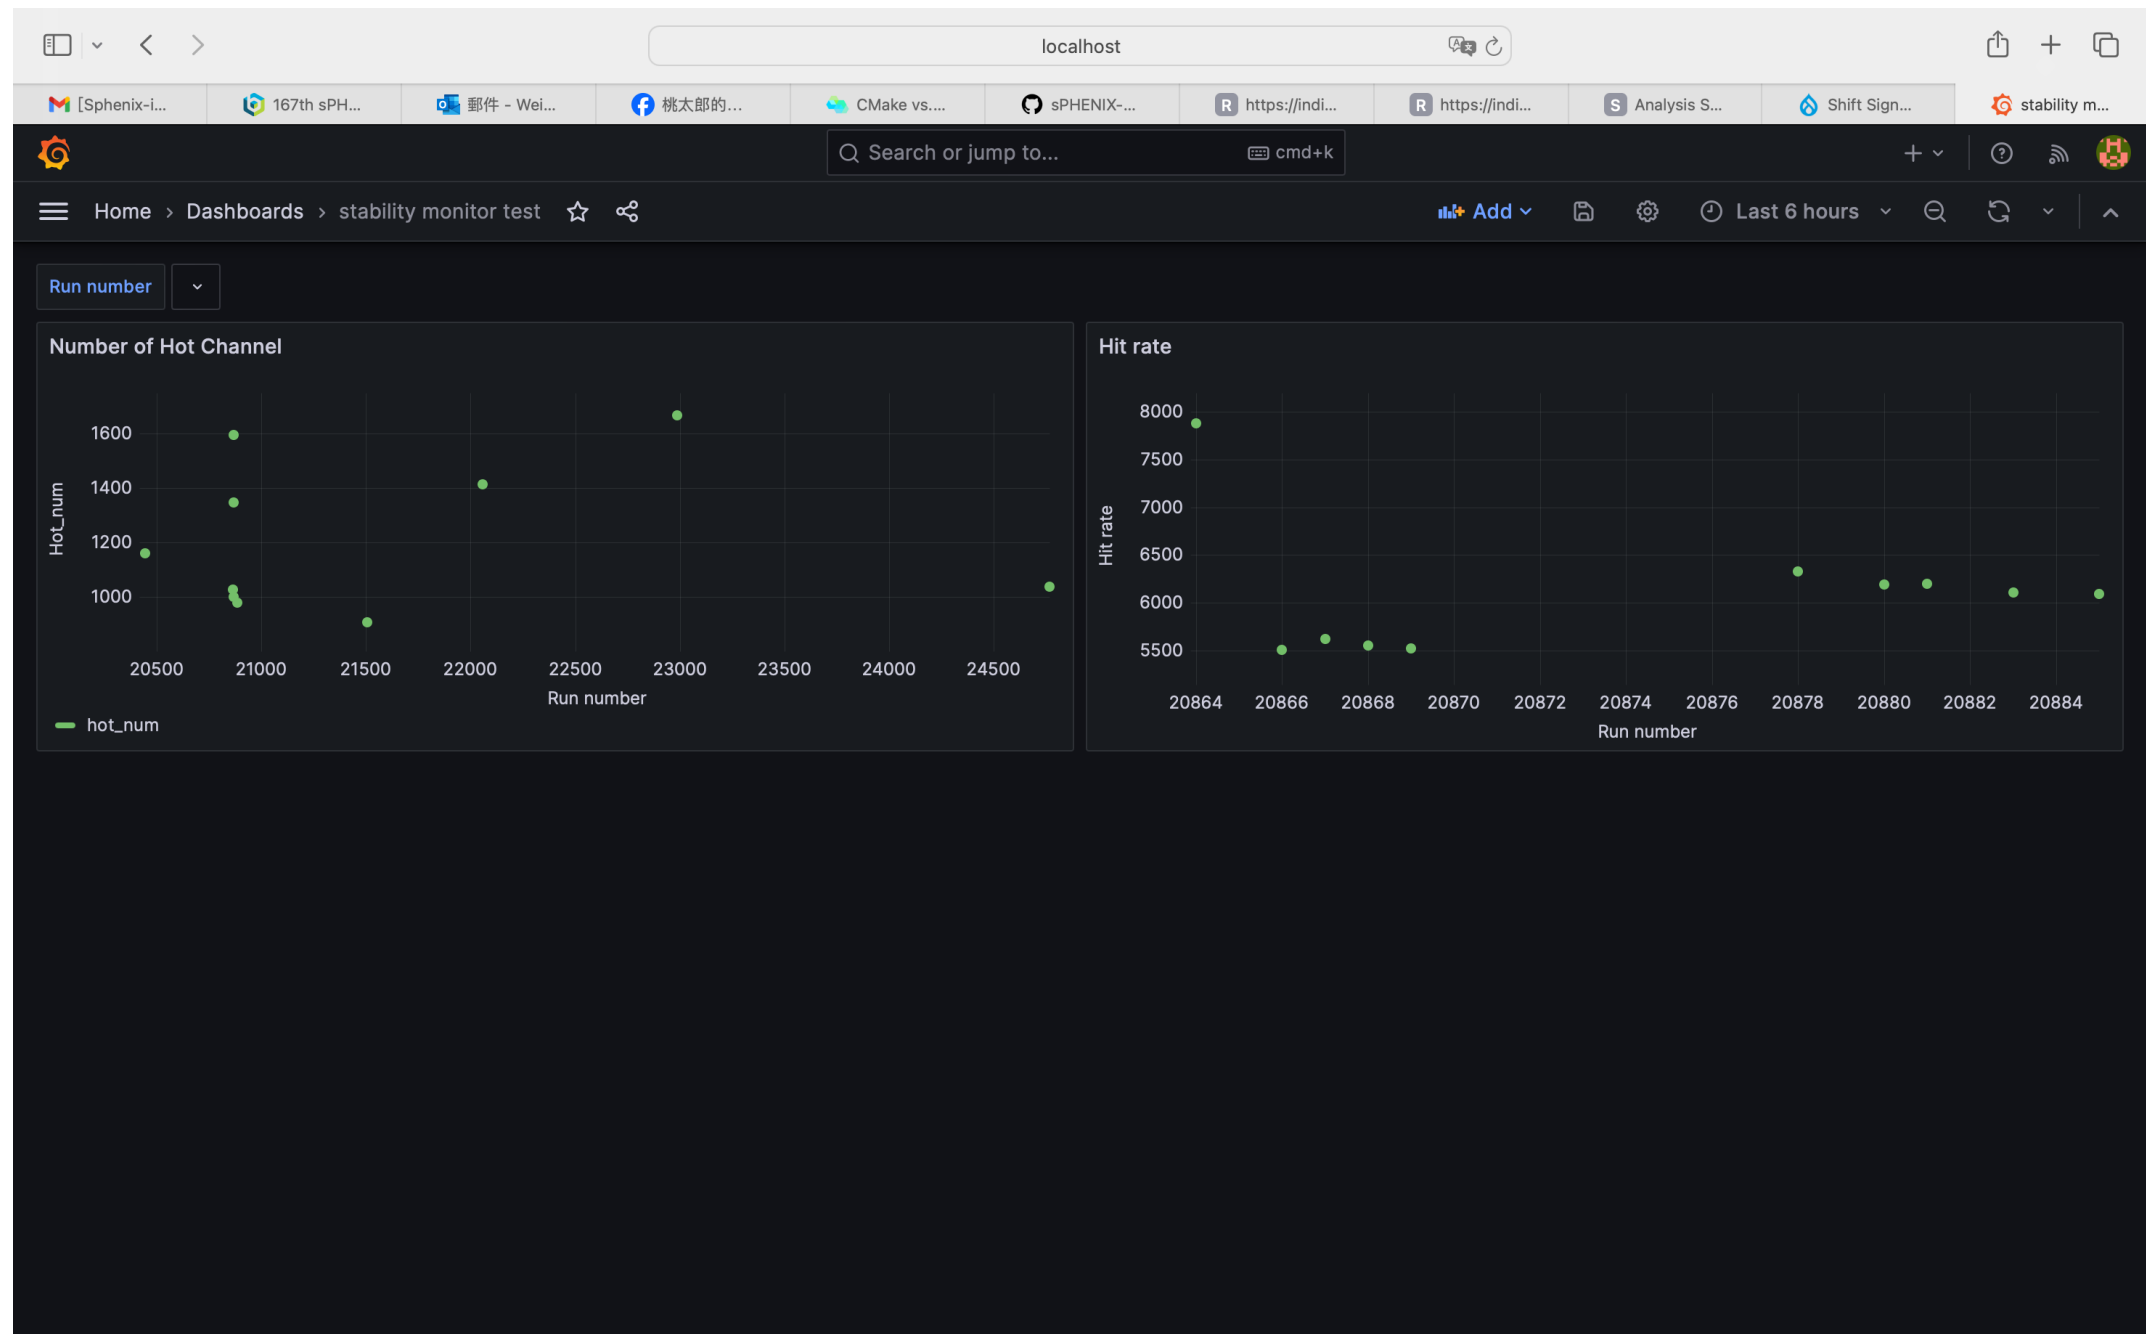

Wei-Che Tang, NCU

Status

- I received the # of hot channel file from Jeain and made it to the stability monitor.

Access to Stability monitor

- If one wants to access to the monitor page, here is the method

  - The server is currently running on inttdaq, the following SSH setting to inttdaq is necessary

```
Host inttdaq
    User inttdev
    HostName %h.sphenix.bnl.gov
    ProxyJump opc0
    LocalForward 3000 localhost:3000
```

  - Once you connect to inttdaq through terminal, open the "localhost:3000/" on the browser

  - Then you should be able to see the Grafana page

  - There is a toolbar on the left side. Find "Dashboards", then you should be able to see the page.
