

Hi all,

Here are the minutes from today's meeting.

o CDBTTree Introduction <Joseph>

– CDBTTree file is a root file. A simple example to open and Set parameter name and value in the root file is presented.

– **Joseph** confirms with Chris if the root file (or even contents of it) is kept in the database or just contains only the path to the file. To be reported in the next INTT meeting.

– **Takashi** send the slide to Joseph. **Joseph** attend the tracking meeting this week to confirm the ladder numbering convention amongst them.

o **Joseph** reply the homework from the software meeting regarding the mixed-up events under investigation and clone hits removal.

o dN/deta progress <Cheng-Wei>

– **Cheng-Wei** should study the delta phi distributions for different z-vertex bins as well as current eta bins.

– **Takashi** is in charge of DAC setting into CDB. **Jaein** is in charge of developing module for BCO cut and save results in CDB.

– **Maya** and **Cheng-Wei** writes the analysis note of data synchronization as required by the last physics coordination meeting to be approved as official.

– **Cheng-Wei** and **Hao-Ren** coordinates to come back in the next INTT meeting for us to review the cluster ntuple.

– **Cheng-Wei** offers vertex reconstruction code to public and let anybody outside the INTT group to develop it in F4A framework to be applicable to field-on data.

Best regards,

–itaru
