

# STAR Status (July 24 - 30, 2024)

Yu Hu, yuhu@lbl.gov

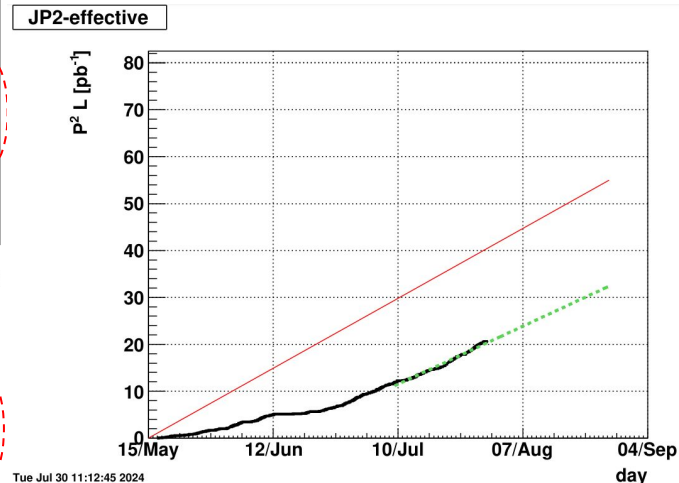

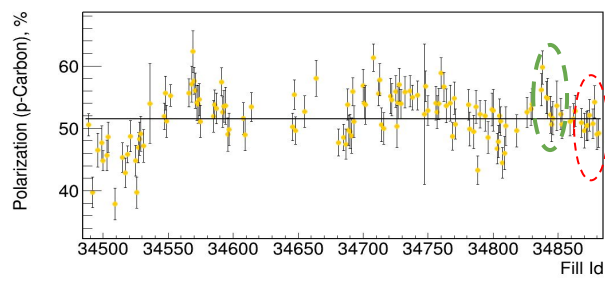

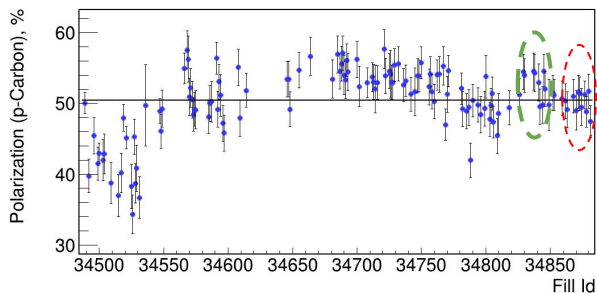

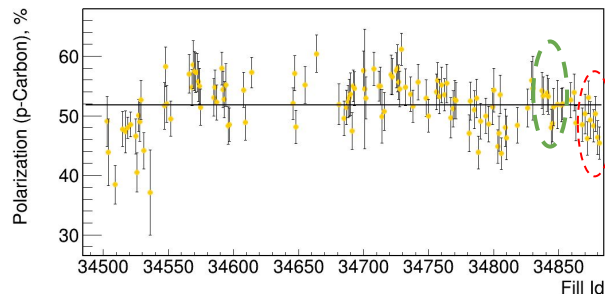

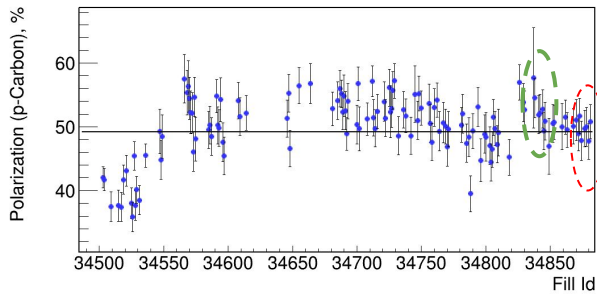

JP2-effective

- July 25: BTOW and Network problem, fixed after access
- July 27: AC in IR stop working, got supported quite efficiently (thanks!), didn't impact our data taking
- July 28-29, network problem, affect some of the online monitoring, didn't impact our data taking
- July 29, power-dip twice, 3 times magnet trip, multiple problems & one of the computer down, just got all the detector back

# Polarization & Luminosity projections

- Polarization decreasing - mentioned on Monday's 9:00 meeting

- Luminosity projections & our original goal
