

STAR status for Run 24 – Sep. 03rd, 2024

Daniel Cebra, University of California, Davis

For the STAR Collaboration

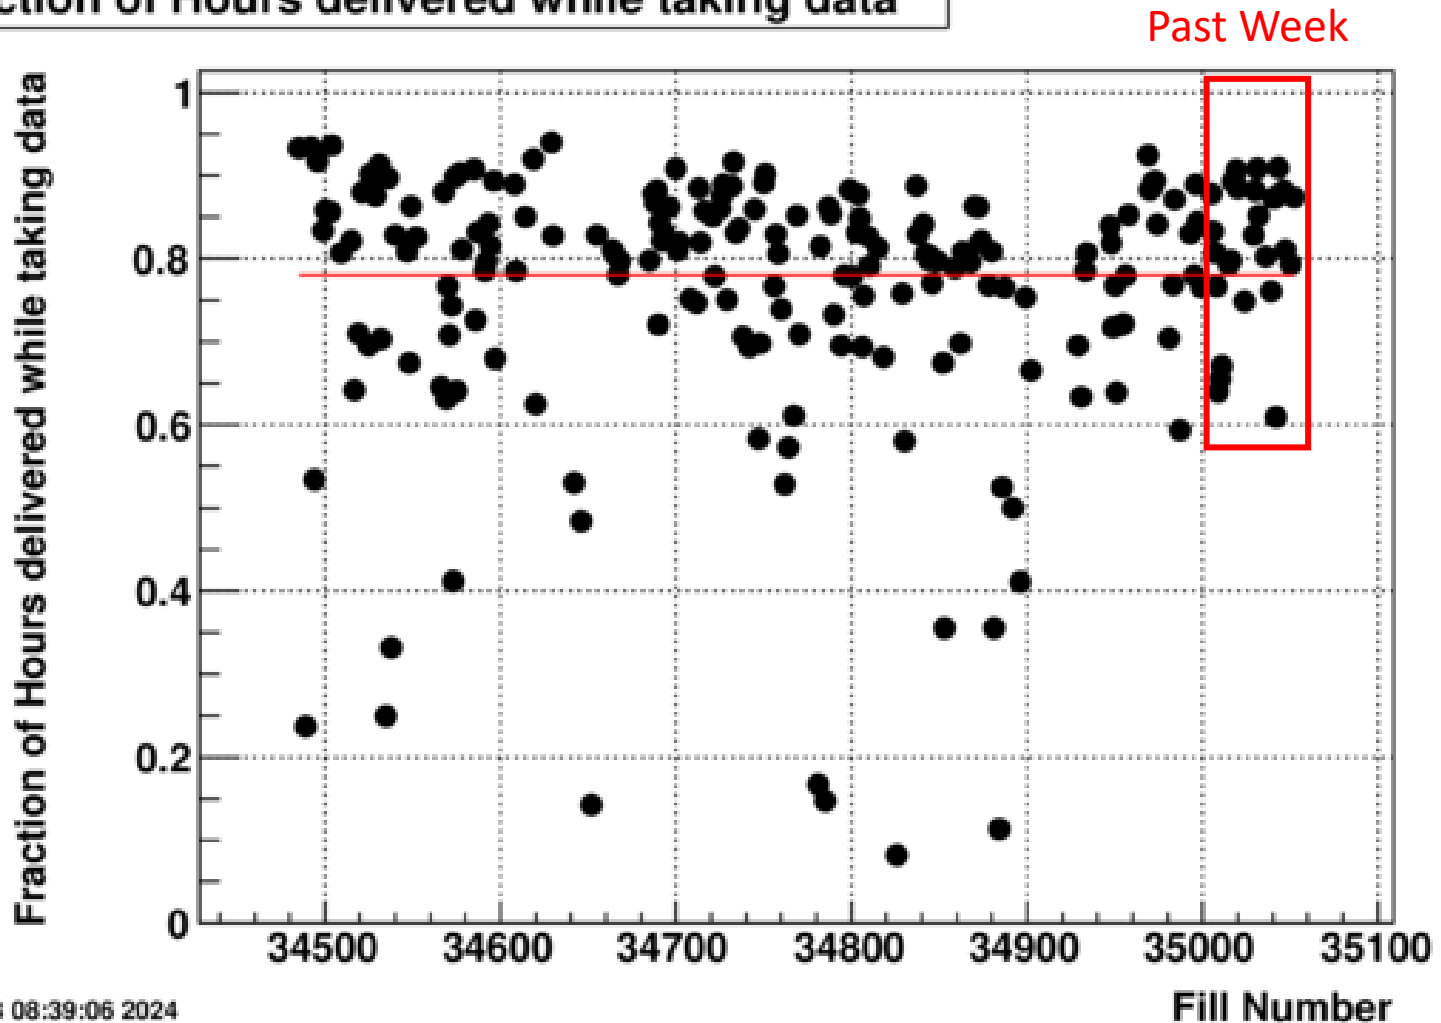

BBC Coincidence Rate
(i.e. Collision Rate)

Review of the Past Week

- **STAR is running well.**
- **Data taking is tracking the collisions.**

Fraction of Hours delivered while taking data

Tue Sep 3 08:39:06 2024

- Average for the run is about 80%.
- For most recent fill the average is above 90%.
- Trying to understand the issue that led to the lowest fractions.₂

Projection for 200 GeV p+p

STAR's Figure of Merit projections taking into account the revised schedule and the recent collider and experiment performance. Projections are approaching the targets for the RUN. These are even a little better than last week.
