

2024 4 15

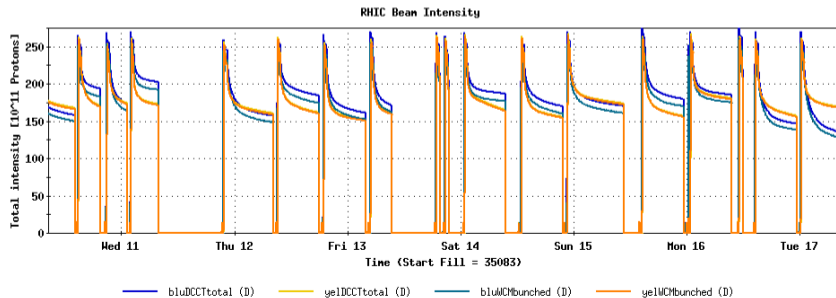

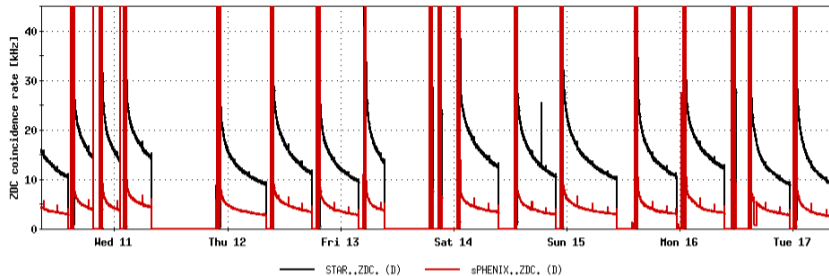

RHIC Status

Kiel Hock

Time Meeting
September 17, 2024

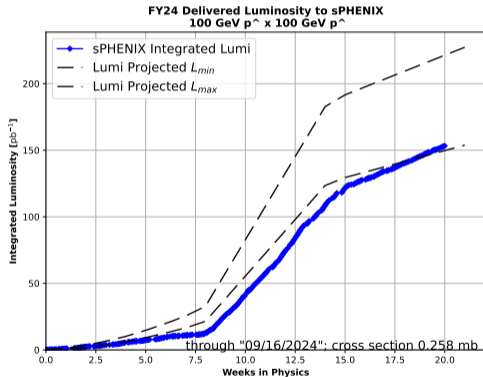

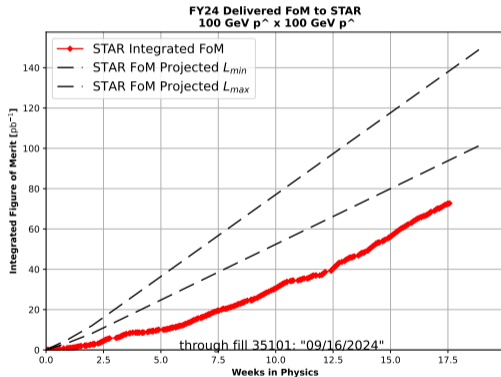

Last Week at RHIC

RHIC status and Lumi Projections

111x111 physics running since 4/30. Preliminary luminosity accounting

Inflection for sPHENIX projections coincides with change in crossing angle.

RHIC Status

- Physics running with up to 2.4×10^{11} /bunch at physics and up to 60% polarization.
- sPHENIX MVTX cooling issues has prompted several accesses to investigate, implement a temporary repair and a permanent repair.
- Sector 8 lead flow issues. Investigation is ongoing.
- RHIC status meeting switched to Monday, Wednesday, and Friday until switch to Au.

Key dates

Event

April 15, 2024 through September 30, 2024

RHIC polarized proton operations

September 30, 2024 through October 21, 2024

RHIC Au operations

October 21, 2024

End of RHIC Run24
