

STAR status for Run 24 – Sep. 24th, 2024

Daniel Kikoła, Warsaw University of Technology
For the STAR Collaboration

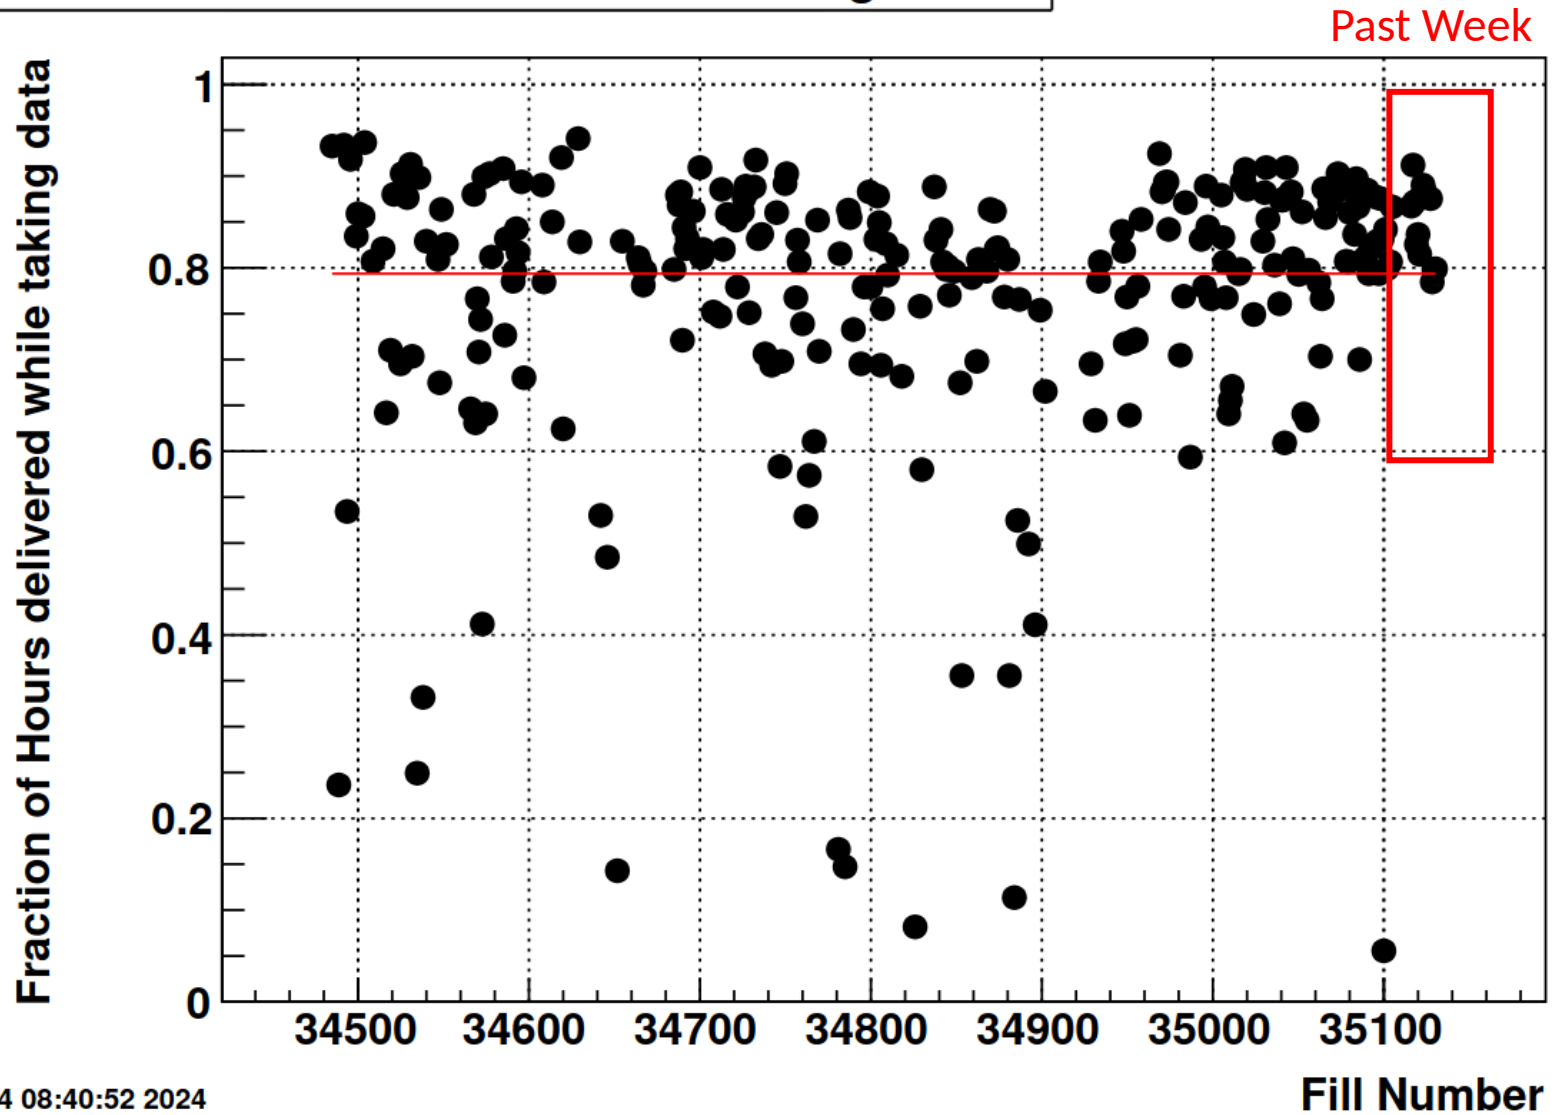

Review of the Past Week

BBC Coincidence Rate
(i.e. Collision Rate)

- STAR is running well.
- Data taking is tracking the collisions.
- Taking cosmics during machine downtime.

Fraction of Hours delivered while taking data

Tue Sep 24 08:40:52 2024

- Average for the run is about 80%.
- For the most recent fills the average is about 85%.

Projection for 200 GeV p+p

STAR's Figure of Merit projections suggest that we will be approaching the targets for the RUN. These current projections are similar to those from the last week.

JP2-effective
