

Status and progress report

Mahiro Ikemoto @ NWU

Status report

- I have been at BNL for a week now.
- We have been measured every night.
- I'm getting used to life at BNL...😊

Progress report

- I have been trying to calculate the residual in angles to do **alignment** from last week.
- Yuri Terasaka @NWU last year had calculated the residual in distance, and I took it over.
- Last week, I read the code and tried to get a plot, but it did not work...😞
I will revisit it.
I could not put up the plot data because SDCC was not working when I was making this slide...😞
