

Invenio/Phonebook updates

CILogon connections

Invenio-oauthclient-cilogon

- Collaborated with Anil Panta of JLAB to clean up the plugin code and generalize variable names and documentation.
- Submitted PR to upstream Invenio with credit for both of us.
- Pushed new version to ganapathy invenio git and applied to inv-container.sdcc.bnl.gov
- Still need to fix untrapped error when user tries to login but are not in acceptable groups.
- Need to adjust Comanage Registry to send new igroup based roles as well as adjusting Invenio plugin to write them to extra data.
