

Preliminary Look At TEX-Hf (HMI-013)

TH Trumbull, Manager Nuclear Data and Methods

> NDAG Meeting November 4, 2024

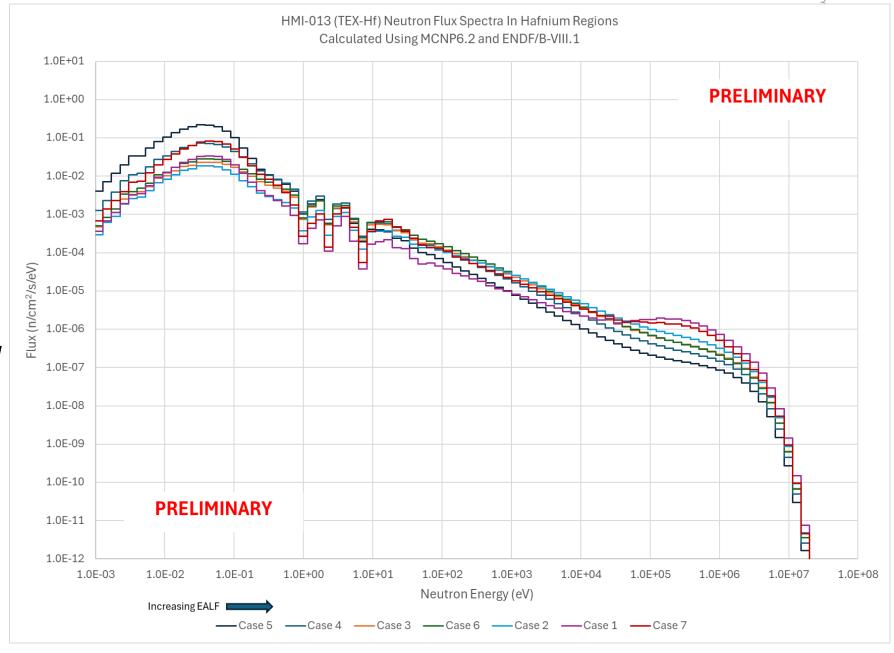

Approach:

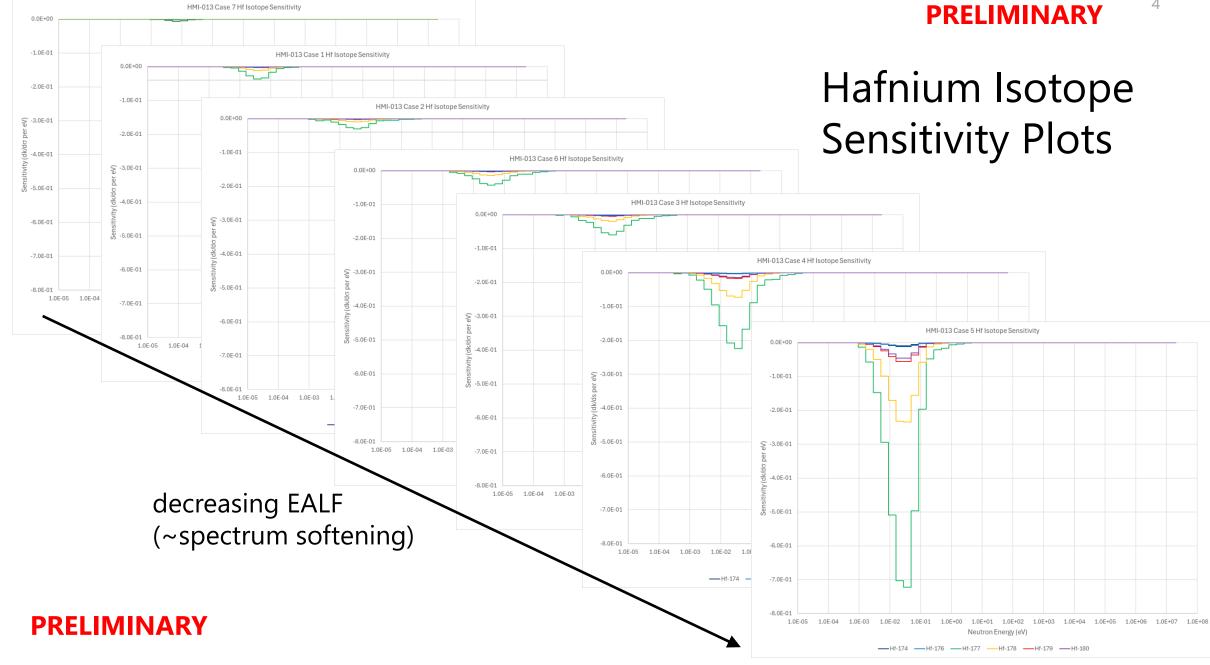

Are we seeing a sensitivity to changes in Hf isotopic cross sections?

- Nuclear Data Used:
 - ENDF/B-VIII.0
 - ENDF/B-VIII.1
 - ENDF/B-VIII.1_FF_HF
 - Based on RPI LINAC measurements
 - ENDF/B-VIII.1 as base data, but with JEFF-3.3 RRR and URR spliced in
 - Processed with NJOY2016.74
- MCNP V6.2
 - Eigenvalues, flux spectra in Hf regions, and Hf sensitivities calculated

Neutron Spectra in Hf Regions

- Expected spectral shift with different cases
- Effect of Hf-177 (n, γ) resonances clear

Eigenvalue Results

- ENDF/B-VIII.1 shows improvement over ENDF/B-VIII.0
- Even better with ENDF/B-VIII.1_FF_HF!
