

# Next INTT workshop?

Genki Nukazuka (RIKEN)

# INTT Workshop

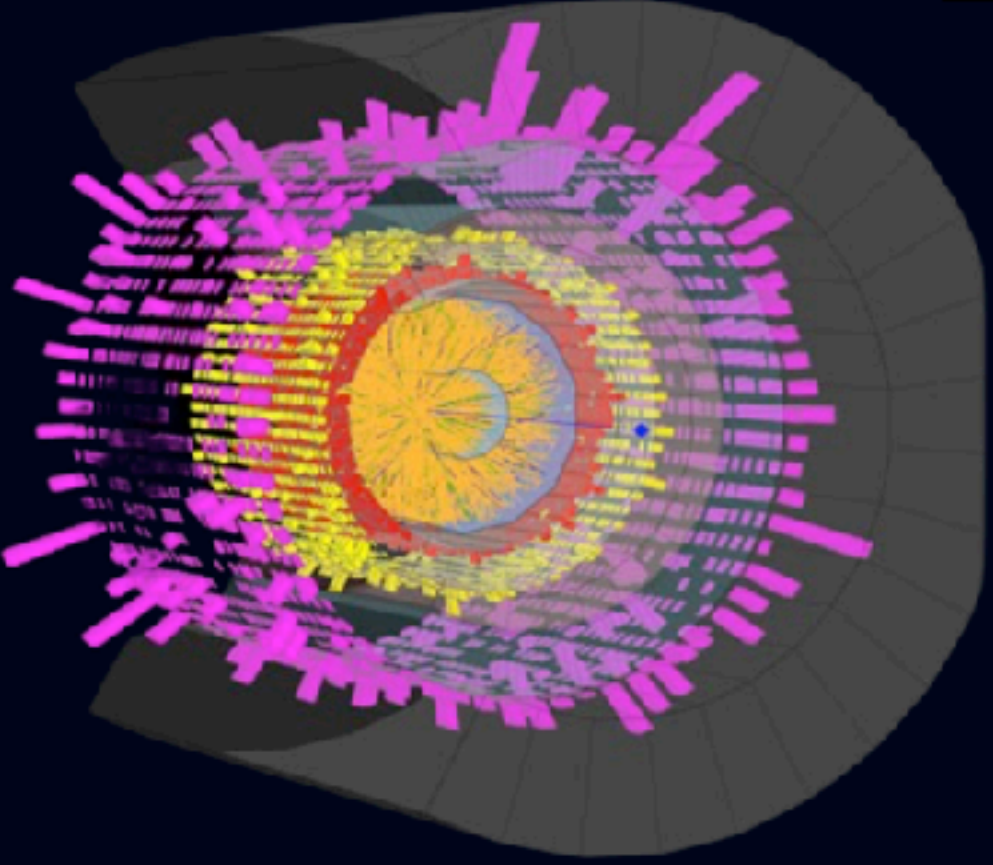

- The INTT workshop@NCU was held about 1 year ago.
- I think the workshop was very successful
  - great progress on their own tasks was made
  - lots of discussions were made
  - enjoyed lectures on physics
  - learned about Fun4All
  - experienced presentations in person
  - enhanced each other
- Do we need the next workshop?
  - One concern in the last workshop was that students enjoyed life toooo much. We didn't expect a party every night.
  - If we really need the next workshop, it should be improved.
  - This is a workshop for students, so students should take their own initiative (not just as participants).
  - Idea: Let's involve students in the organization. People can focus on the program more if it's organized by themselves.

2023

# SPHENIX

## INTT Analysis Workshop

**2023**  
|  
**NOV 6-17**

**National Central University**  
**Taiwan**

Organizing Committee: Genki Nukazuka (RIKEN Japan)  
Itaru Nakagawa (RIKEN Japan)  
Chia-Ming Kuo (NCU Taiwan)

Sponsored by:  **CHiP**  
  

# INTT Workshop

- If you want the next workshop, please contribute organization. First of all, we need to make a program.
- **To students: Please think about what you want to do in the next workshop and summarize your ideas.** You can discuss this in Zoom meetings and chat if needed.

Hint:

- What can be changed from the last workshop? What was good/bad?
  - Is time for work needed?
  - What about the presentations in the last workshop? Do you need it? Were they too long/short?
  - What about the talks by Ph.D. students?
  - Do you need time for lectures? What topic? Physics? General technic? Fun4All? Something else?
  - The summary of ideas doesn't need to be perfect. Please collect ideas from as many as students possible.
  - It's good to have a representative.
  - Genki and all the staff can help you.
- Condition and restriction of the next workshop:
    - on November
    - for about 2 weeks (10 — 14 days?)
    - Attendants are assumed to be working for INTT mainly.
    - no need to think about the place of the workshop
  - Please show the summary in the next INTT meeting.
