

Student Status Report

2024/11/22 Takahiro Kikuchi

Progress

- I learned how to use psql from **Jaein**.
- Reading information about BCO and Acceptance from CDB TTree.
- Count BCO diff peak and write all information into psql database.
→Next is hit rate, I think it still need some discussion with Jaein.
- Got lecture about cluster phi size QA from **Ryota**.
→At first, I have to make same plot of AuAu and decide what kind of information I will write in the database.
- Other things...
- Wrote request for Angelika to get beam emittance profile and reading some paper about accelerator physics.
