

Analysis Plan in workshop

Name : Cheng-Wei Shih (3rd year of PhD program)
Institution : National Central University/RIKEN

- **Goal:**
Preparation of beam test paper article & dNdeta analysis with INTT Run24 data
- **Status of the topics**
 1. Beam test: have all the money plots & results (60%)
 2. dNdEta : have the basic skeleton of the analysis flow (40%)
- **Goal for the workshop**
 1. Beam test:
 - review the results,
 - prepare the cluster phi size distribution with different runs (run 52 and run 89), and
 - have the first draft of beam test paper
 2. dNdEta
 - Done with the improving of my workflow
 - Some more data quality check (weird correlation in the inner-outer multiplicity correlation)
- **Side Project:** I will have to give a sPHENIX overview talk on Friday this week in a internal workshop in Taiwan
