

# Backward ECal: comments to pre-TDR version 0.1

---

## General comments:

- Standardize format between different calorimetry sections (tables, plots, figures)
- Add comments about upgrades over the lifetime of the experiment
- Layout in more detail plans prior to installation in 2028, including R&D and construction
- Add more references
- Complete missing sections
- Risk registries should go to the project section, while individual detector sections should focus on their technical designs

## Number of typos and minor request clarifications

### Request for more details:

- Cooling
- Discrete readout electronics, COTS devices
- Calibration, alignment and monitoring
