

# Inclusive PWG Update

- Most recent Inclusive PWG meeting held Nov 25<sup>th</sup>
- PreTDR feedback discussed, main areas requiring attention identified
  - Mostly updates to plots
  - Electron finder description needs updating → Also aim to add some kind of benchmark plot
- Notice lack of eA in inclusive group sections of PreTDR
  - Win Lin (SBU) working on  $A_1$  with He3 (good progress being made)
  - Currently don't have anyone working on e on heavy A

# Update to Kinematic Resolutions plot

**Suggest going with this plot**

- Plots show resolutions obtained by looking at InclusiveKinematicsXX collections from 24.10.0 campaign
- Note: InclusiveKinematicsXX use ScatteredElectronsTruth as input
- This may be preferable** → keep resolutions factorised from e-finding efficiency/purity

# Update to $A_1^p$ plot

- $A_1^p$  plot to be updated to use multiplicative constant to better show variation with  $Q^2$
