

# Update on EEEMCal simulation geometry

Dmitry Kalinkin

University of Kentucky

## Latest CAD model

More towers on the outside, wall thickness 9.79 mm at minimum

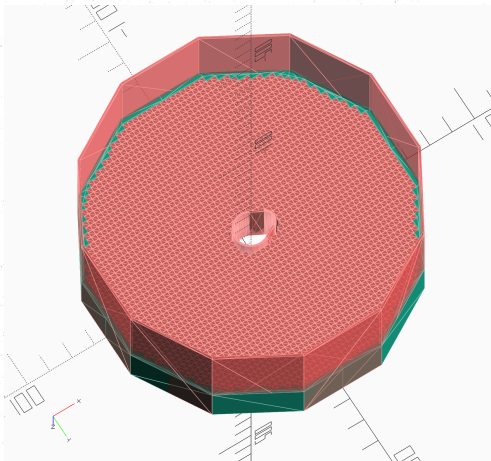

Left: comparison to 24.12.0 geometry, Right: new version -  
<https://github.com/eic/epic/pull/815>  
Dodecagon CAD, DD4hep geometry

Inner support "collar" doesn't fit anymore:

Thickness of support "frame" reduced to 9.79 mm, but this is **not** based on the newest CAD model.

## Alternative CAD model

New outer radius instead 65.0 cm

## Circular CAD, DD4hep geometry

# Circular CAD, Dodecagon CAD
