

Dear all,

Here is the minutes from today's meeting.

o APR Plots <Itaru>

- Itaru sent out plots to be printed in student's APR to physics coordinators. He is under negotiation to be the exempt of the preliminary requirement.
- Joseph will write the APR for the INTT alignment with field on.
- **Joseph** will write the analysis note and go for the preliminary request next week.

o Mixed up in streamreadout <Itaru>

- Itaru is in contact with Raul to discuss about the mixup events in the stream readout. At this moment, Itaru, Takashi, Mai, and Raul, all agree that the mixup can happen in the present scheme. We don't have any idea how to resolve the mixup in the stream readout neither for data already took nor possible new data taking in the future. We'll continue the discussion and investigation.

o Cosmic Ray Plots <Wei-Che>

- **Wei-Che** removes "Angle" from the horizontal axis title.

o Preparation for Run25

- Akitomo and Joseph work together to clean up the script directory for rcdag before Run25.

o Next meeting

- **Akitomo** will take the chair the next meeting.

Regards,

-itaru
