

# STAR Status Update

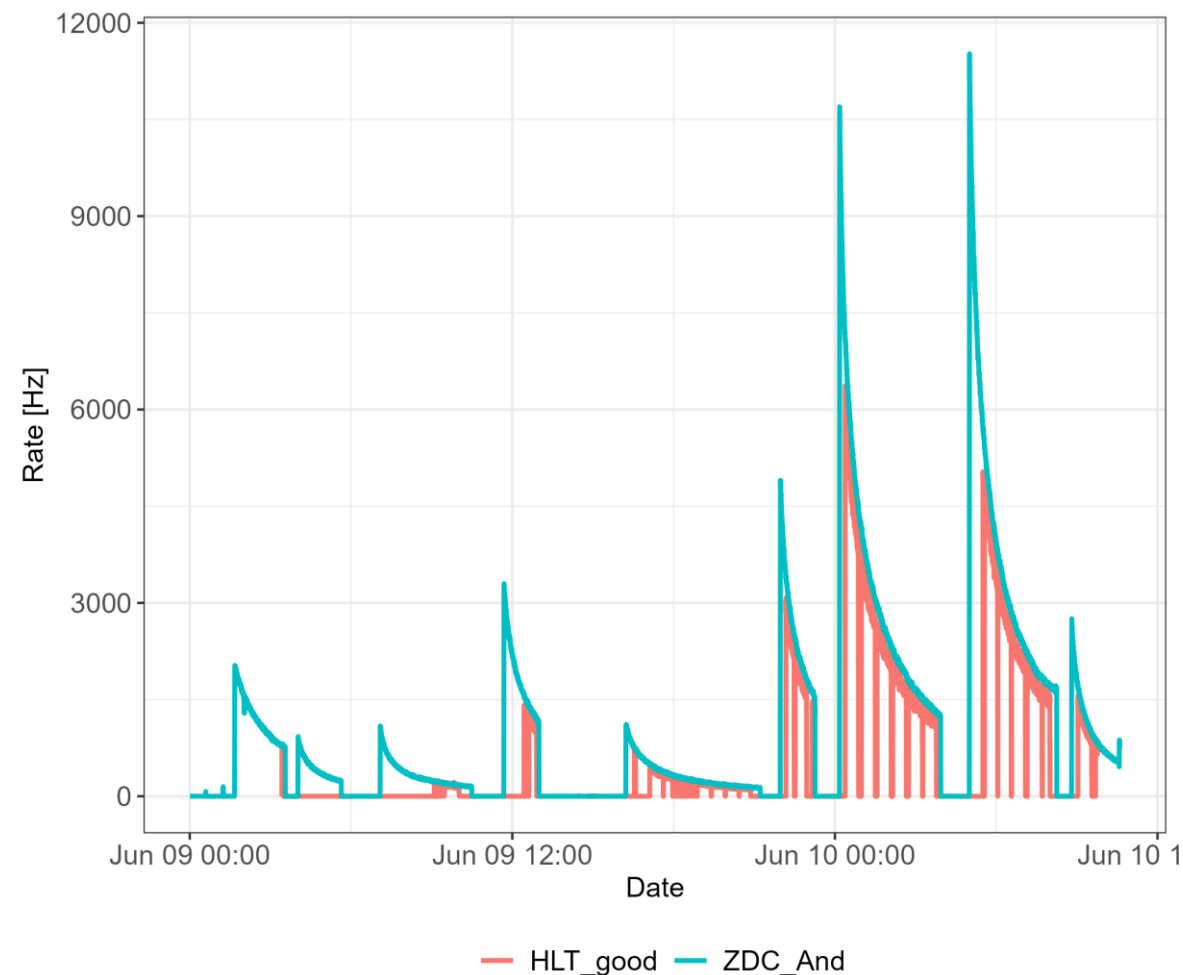

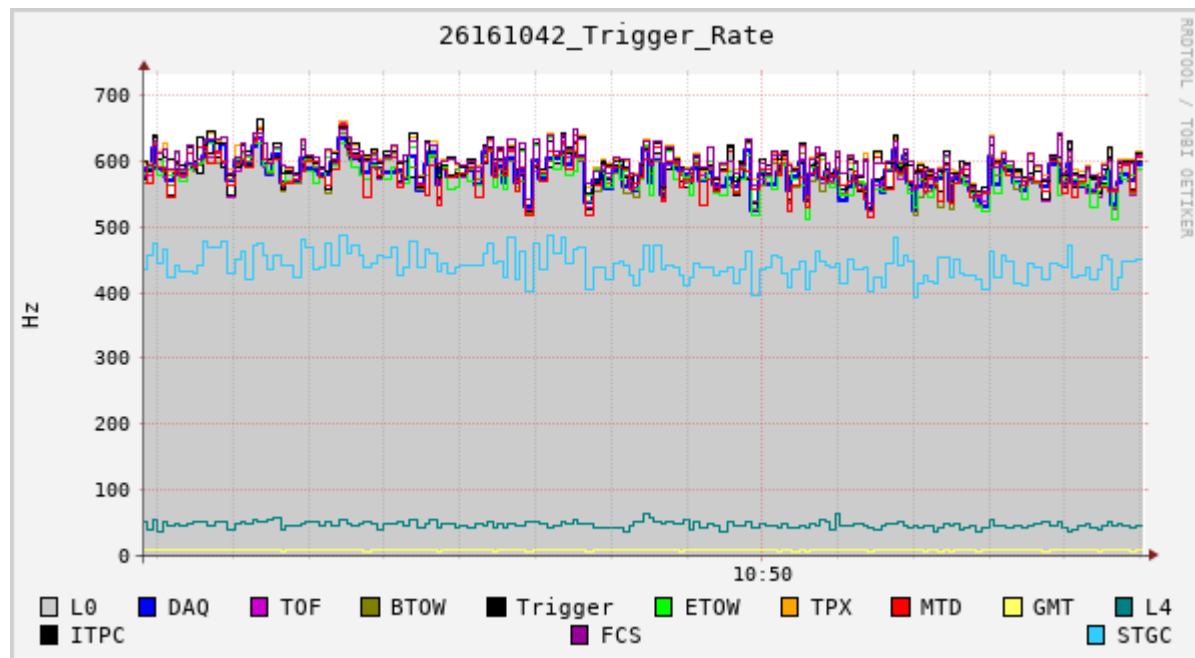

June 10, 2025

Irakli Chakaberia

## Status Report AuAu 200 GeV Run

- First collisions on Monday morning were used to check timing
- Calibration of trigger detectors have been performed
- Final calibration settings are expected to be deployed shortly
- After this STAR is ready to declare physics for all the triggers

## AuAu200 Status [II]

- Primary vertex seems centered
- When we are running production this vertex value is also passed to MCR as before
