

# STAR Status Update

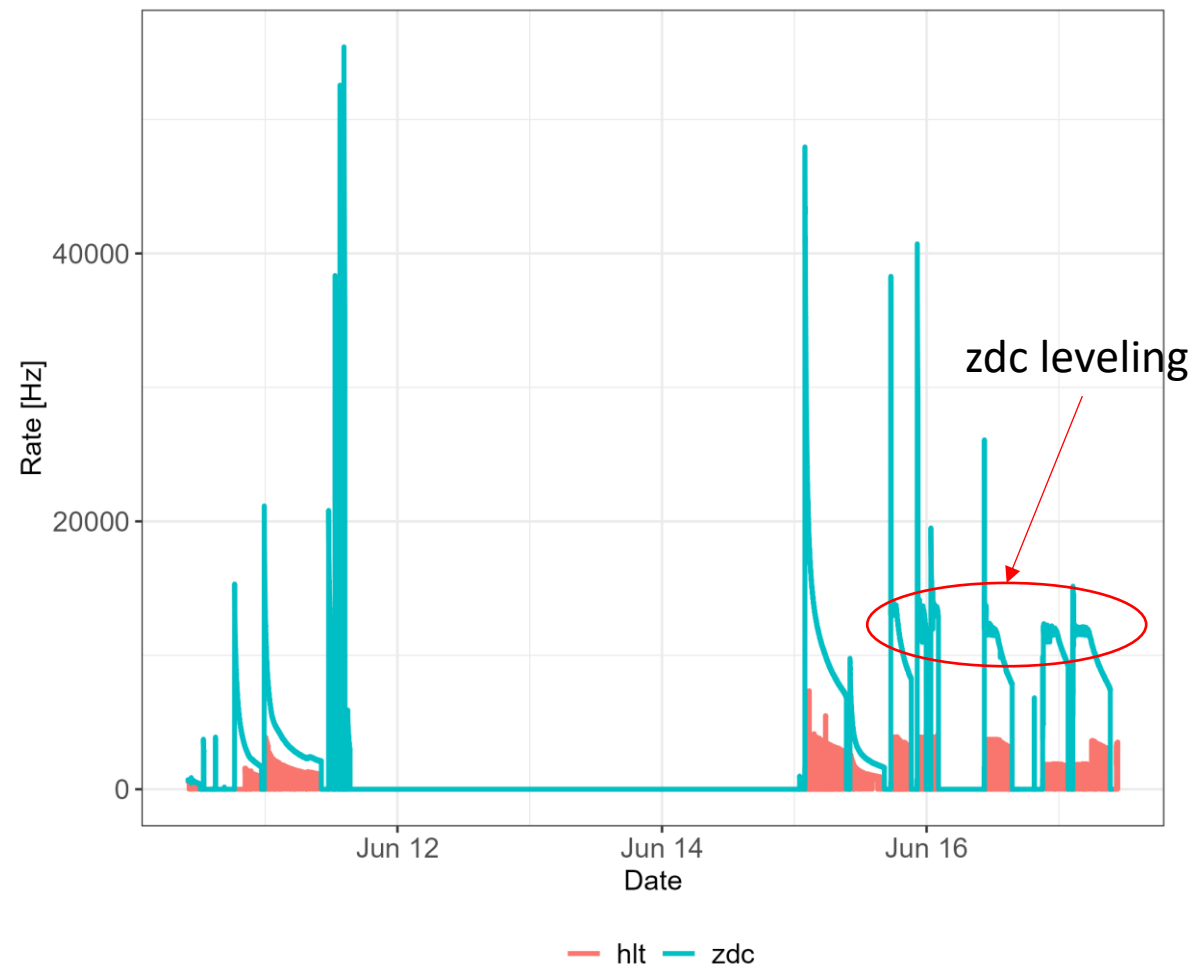

June 17, 2025

Irakli Chakaberia

# Status for AuAu200 GeV

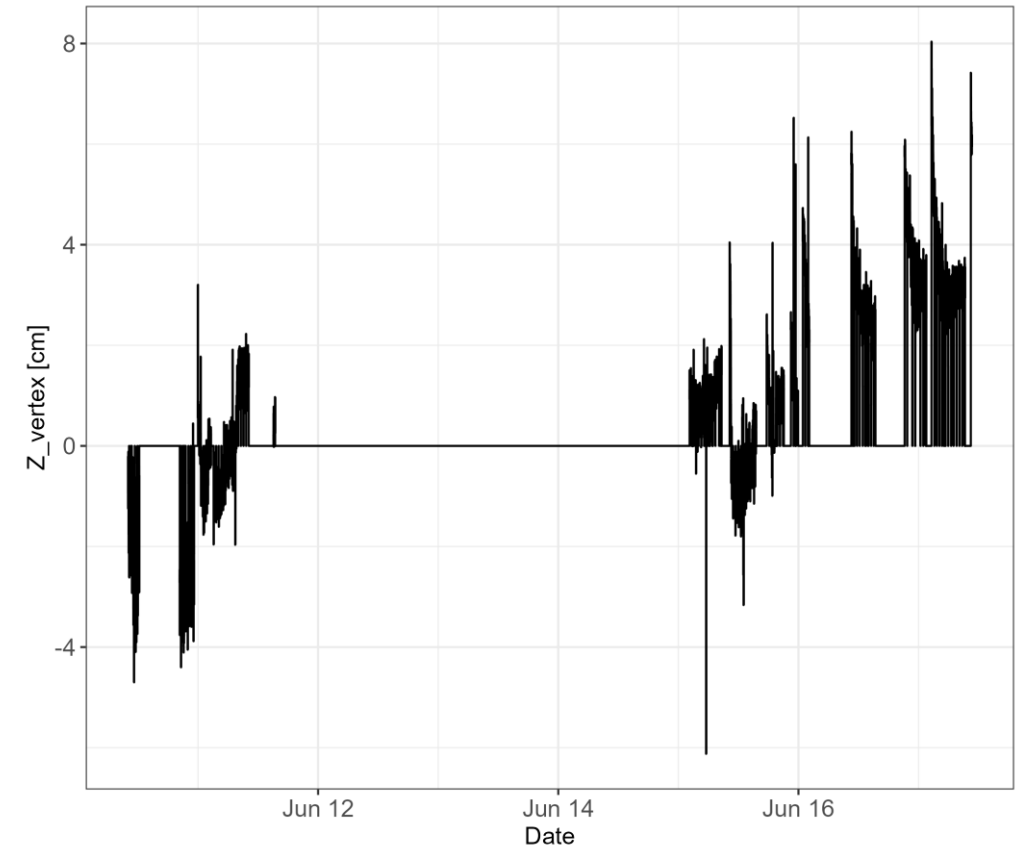

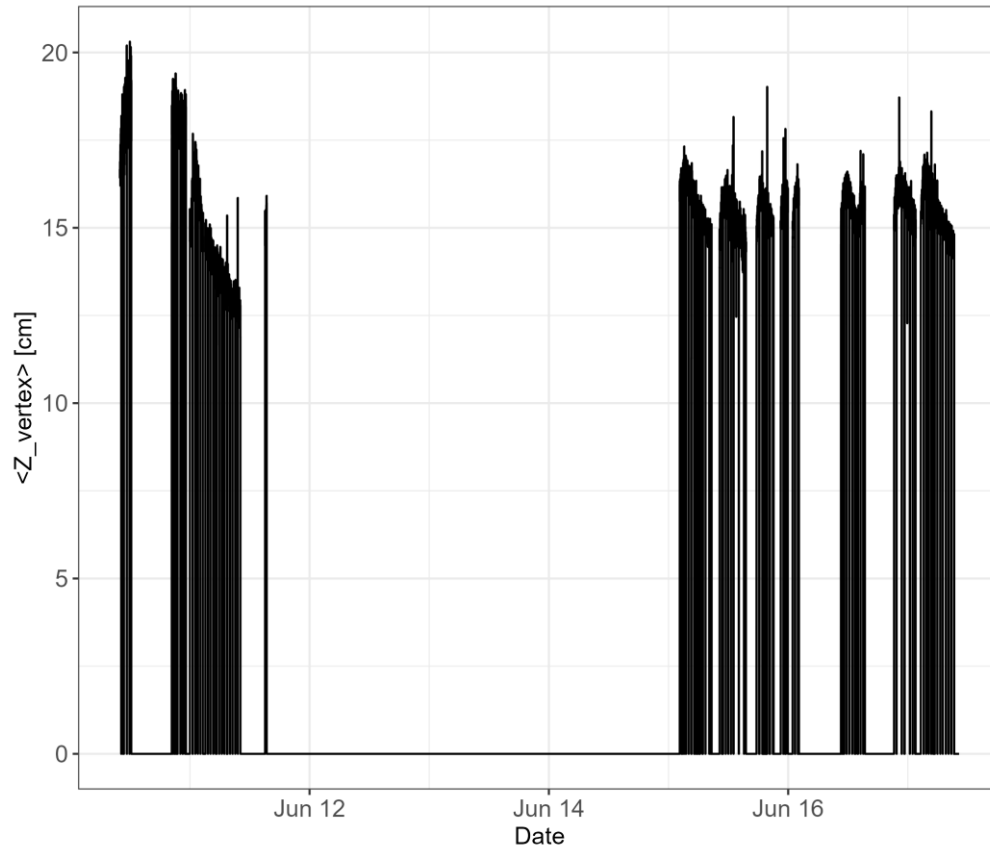

- STAR was ready to continue data collection as beams came back early on Sunday
- We requested zdc rate leveling at 13 kHz as high rates were delivered
- EPD calibration was finalized
- ALL STAR triggers elevated to PHYSICS

# Vertex Distribution

- Primary vertex is kept within 5 cm of the center along the beam line

# Data Collection

- With 111 bunch beam total DAQ rates are at 4 kHz
- About 304 M zdc MB events were collected by today morning
