

# Operations Timing Meeting

Travis Shrey 07/08/2025

# Programs

- BLIP
  - Off
  - Linac continues to be used for Polarized Proton work until this evening
- NSRL
  - 46.8 hours of science, 4.7 hours of MD, 6.8 hours of failure
  - 18 collector trips
- RHIC
  - 95.4 hours of physics, 29.35 hours of failure, availability at 82.5%

RHIC & NSRL working together to use a 4.8 second supercycle; NSRL is off during injection for RHIC, when Au is not needed in the injectors NSRL uses the shorter time for more beam flux.
