

# Physics

- RHIC is running well
  - > 98/96% ramp efficiency
  - > 56 MHz off last week
- STAR 100kHz leveling now sustained for over 3 hours from lumi event
- Maintenance day Wednesday, extended recovery (none related to maintenance itself)
- Storage cavity issues plaguing both rings, RF group working around the clock to keep us running
- Novel injector setup to provide 3 pulses per AGS cycle. Tested Tues evening, need more work to make it operational.

# Moving ahead

- Maintain quick turnaround times
- Restore 56 if possible
- APEX Wednesday
- PHYSICS
