

CeC status, 12/16/25

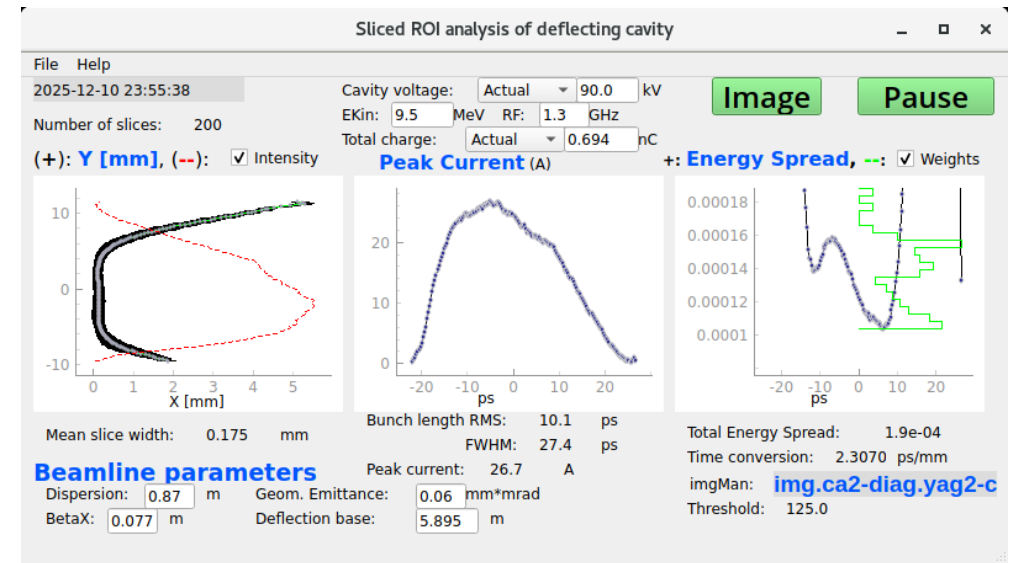

- Re-established KPP measurements after RHIC switched to pp run.
- Lattice is frozen for APEX on 12/17.
- RF and Laser experts continued to help improve stability of the machine.

Linac's voltage variation (sigma) dropped from 0.7 to 0.4 kV

Slice emit ~ 0.8 – 0.9 μm , proj. emit ~ 1-1.5 μm

Slice energy spread for core < 1.5e-4, slew is within the same range.
