

STAR status for Run 26 – Jan. 20th, 2026

*Daniel Cebra, University of California, Davis
For the STAR Collaboration*

- STAR has been bringing the detector back into a ready state over the past week.
- Taking beam-gas events to simulate Fixed-target performance.
- Magnet has been stable for the past week, auxiliary chiller is on site and ready.
- All detector systems are performing as expected. ➔ **STAR is ready to take data.**
