o Silicon Track matching with EMCal clusters <Yuko>

–Yuko calls to join the team to investigate the silicon track matching with EMCal clusters for the performance evaluation of the INTT detector and possible applications to other purposes.

– For the time being, the main communication tool is the mattermost channel INTTCaloTracking. **Yuko** will change this channel to be public.

– The bi-weekly meeting time is currently set to Wednesday at 2PM in JST. **Yuko** will prompt to re-arrange the meeting time in the mattermost channel to accommodate possible participants from different time zones.

o Run25 commissioning plan <Cheng-Wei>

– **Akitomo** continues to develop the plan for the various studies to be done during the commissioning period of Run25 including prioritize each items.

– **Itaru** will compile the information about the issues we have (carry over hits and hit overflows) and request of expanding the BCO busy window. **Itaru** will circulate to the material to the INTT team. Itaru will report to key personnels for the Run25 operations while he is in BNL next Month.

o NIM paper <Itaru>

– Planning to release the modified version of the NIM draft to INTT team after the collaboration review next week and proceed to the submission. The dN/deta paper is quickly comming.
