

STAR Status - 6/10

- **ZDC scalars now correctly counting (setting issues in TCIM)**
- **Physics running; all detectors up**
- **Min-bias data need leveling soon (ZDC at 13k) as luminosity ramp-up**
- **Min-bias (low-lumi) and high-pT (high-lumi) mix will start in a few days**
 - High-luminosity mode: No crossing angle, no leveling
 - Switching modes between high- and low-luminosity modes in a fill

Live updates from STAR (when TPC and L4 running)
