

# STAR Status - 6/17

- Running Min-bias with all detectors – 320 M
- Request high-pT/high-luminosity running starting Friday
  - High-lumi mode: No crossing angle, no leveling
  - initial proposal: run high-lumi for the first 4 hours, then switch to Min-bias/low-lumi for the last 2 hours of a 6-hour nominal fill

# background

- **High Background in Blue (as in Run23, 24 AuAu)**
- **Blue background dependent on collision rates at STAR and sPHENIX - “Au78”**
