

Dear all,

Here is the minutes from today's meeting.

o Onsite report <Yuko>

- Digital control test was conducted. The data should be analyzed by **Tomoki** once the data are processed.
- Genki may delay his travel from originally planned April 2nd to later, may be April 7th.
- **Akitomo** will let Joseph understand the commissioning program so that Joseph and Rachid can execute various test programs.

o Run QA <Jaein>

- Run QA scheme has been polished by Jaein for smooth transition to Takahiro.
- **Jaein** will make another version of the flow chart involving offline production as well.
- **Jaein** and **Akitomo** will discuss about the development of the offline QA to database.
- **Jaein** contacts with Maureen for the renewal request status of the guest appointment.

o Report from the operation meeting <Cheng-Wei>

- Requested commissioning test programs to the operation meeting.
- Jin suggested to explore the option to run in the stream readout mode rather than the trigger mode which requires to extend the trigger busy veto window.
- Although our understanding of the stream readout mode data taking is way behind the trigger mode, we take Jin's suggestion seriously. **Takashi** succeeds the analysis code from Mai and study if the carry over hits are recoverable, means can assign correct FULL_BCO time stamp. This is the level of the criteria if we can run with stream readout mode for Run25. We need to reach to the level within two weeks or so.
- **Akitomo/Cheng-Wei** will keep Jin informed about our strategy and plan.
- In parallel, **Cheng-Wei** will try to recover the carry over hits in the trigger mode data.

Akitomo will run the meeting next week since Itaru won't be available.

Best regards,

-itaru
