

## Simulation News

---

### ❑ Tracking Meeting

- Shujie presented some DIS tracking performances in the embedded backgrounds
- Plans to update results with 18 GeV x 275 GeV setting and latest backgrounds [presented](#) at [TIC meeting](#)

### ❑ PRs that could have impact on angular resolutions at hpDIRC

- BIC tracking layer implemented into EICrecon and ACTS tracking (Wouter): [PR #710](#)
- Allow backward TrackPropagation (Wouter): [PR #1921](#)

### ❑ Request from Tracking WG:

- As embedded background tracking studies begin, tracking WG wants to [verify detector thresholds are up-to-date](#)
- Current threshold set to 100 eV
