Nextgen Centralized AAI at BNL?

- Centrify aging
- Direct membership to BNL's cloud AD via onsite DC?
- Looking towards global solution adoptable across BNL
- Issues to resolve, or atleast minimize / step towards resolving:
  - uid/gid/username differences and conflicts
  - ITD to date willing to facilitate, but not dictate
  - must reach consensus on our own
- NSLS-II and ITD seem to be leading the way, SCDF looking to join, anyone else interested?
