

Cable and connectors suggestions for ePIC SVT
CB-FIB control cable

Some requirements (from various emails)

From James

“cable and connector option for a (digital) low voltage and (digital) signal cable to also go on these FIBs (interconnecting them to a Control Board)”

“The current consideration is a [25-pin nano-D connector](#)”

“a surface mount, right-angle connector on the CB and a through-hole, straight connector on the FIB.”

“These would be connected with a shielded cable of the required 25 wires (each [wire a minimum of 30AWG](#))”

(NR: note that Nano-D connectors cannot support wire larger than 30AWG)

From Georg

“We want multicore with common shield. There are no particularly fast digital signal, just control signals. Material is copper-clad aluminium, as with the other cables.”

“We need [radiation hardness up to 10krad](#), so not particularly demanding.

They should be [non-magnetic](#), but I can't give you a numeric specification (we never had one for ATLAS).

(NR: I would suggest the magneticity value of ' $\leq 200\text{nT}$ '? I believe this is the spec of the standard AXON connectors? See the slide on non-magnetic connectors. From previous AXON email “[AXON] have been involved with at least one space-based science experiment where our standard connector types ... already had sufficiently low magnetism levels”)

Also

How many assemblies? (estimate)

What is the estimated maximum length of the assembly?

Calculation of the [voltage drop](#) along the wires may be needed because it is a very thin (30AWG) aluminium wire

Assumption: the cable assembly is terminated at both ends with connectors, nano-D connectors cannot be terminated by the end user

Assumption: ARACON low mass shielding required

Initial suggestions

I understand that 'AXON cable' is a company that has supplied custom cable for the Atlas project at CERN, and they say that they can customise cable and connectors to customer requirements. Therefore, I have made it the focus of my search.

It seems that there is no straightforward solution off the catalogue, a level of customisation is required.

After going through their website and various literature, I have come out with some suggestions for you to evaluate.

Please review the information in this document and consult the datasheets for information that you require and is not included in this presentation.

From previous emails, AXON says

“customisation is an everyday occurrence for us and not the exception ... a custom solution would not be more costly or take longer than a catalogue one for us”

GLOSSARY
OF TERMS

- JACKSCREW 1 Captivated, hexagonal socket head.
 RETAINER 2 Non removable, to keep the jackscrew captivated.
 SHELL 3 Metal connector body.
 THREADED INSERT 4 Non removable, mates with jackscrew.
 TWIST PIN 5 Male contact, fitted to plug connector.
 INSERT 6 Moulded insulation housing, separating each connection.
 SOCKET 7 Female contact, fitted to socket connector (also known as socket).
 TRAY 8 Junction box used for PCB connectors only.

- Standard connector • Manufactured to the standard dimensions and specifications.
 Special connector • A standard connector modified to meet specific requirements.
 Custom made connector • Designed to meet specific customer requirements.
 Connector saver • Used to reduce wear and tear on equipment and systems while testing.
 CBR connector • Condensed Board Right Angle connector.
 BS connector • Board Straight connector.
 SMV connector • Surface Mount Vertical connector.
 SMH connector • Surface Mount Horizontal connector.
 Pigtail connector • Connector with insulated or uninsulated wires.
 Cord • Cable harness with 2 connectors only.
 Jumper/ Extension cord • Cord with 1 plug and 1 receptacle connector of the same number of ways.
 Harness • Multi-branched cable assembly.
 LCP • Liquid Crystal Polymer.
 Potting • Epoxy compound used as an encapsulant.

'AXON cable' nano-D connectors

A link to the datasheet\catalogue [axon-nano-D-connectors_cg.pdf](#)

► Characteristics

- 0.635 mm (.025") contact spacing (double the density of a Micro-D).
- Number of ways: 9, 15, 21, 25, 31, 37 and 51.
- Single or double row.
- High reliability twist pin contacts.
- Metal shell construction with captivated hardware.

AXON' has also developed custom designed Nano-D connectors:

- High density circular Nano-D connectors.
- Single row Nano-D strip connectors.

Special Nano-D connectors available on request.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE		MATERIAL & FINISH	
CURRENT RATING	1 A max.	SHELL	Aluminium alloy 6061 or 300 series stainless steel or titanium alloy, see page 209 for finish
CONTACT RESISTANCE	71 mΩ max.		
INSULATION RESISTANCE	5000 MΩ min. @ 100 Vdc	BACKSHELL	Aluminium alloy 6061 with nickel plating
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 250 Vac Altitude 21 km (70,000 ft): 100 Vac	MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
CONTACT ENGAGING FORCE	141 g max. (5 oz)	PIN CONTACT	Precious gold alloy
CONTACT SEPARATING FORCE	11 g min. (0.4 oz)	SOCKET CONTACT	Precious gold alloy
CONTACT RETENTION	0.9 kg (2 lbs)	ENCAPSULANT	Epoxy resin
DURABILITY	200 mating cycles min.	HARDWARE	300 series stainless steel, passivated
VIBRATION	20g's – No discontinuity > 1 μs		
SHOCK	100g's – No discontinuity > 1 μs		

Any preference for the gender of the connectors on the boards?

A) Both the plug and receptacle seem fairly well shielded (from fingers), so this is not a huge problem. Potentially, having the plug on the CB and receptacle on the FIB (with a receptacle-to-plug cable between) may be a starting point. The most important point is making sure that the cable connections (at both ends, regardless of the connector gender) have the locking screws (with threaded holes on the PCB connectors).

Connector for the FIB board

ND2A 2 25 P BS P G 1 ?

BS TYPE

DUAL ROW VERTICAL PCB PLUG

0.050" PITCH

- Reliability for micro-miniature operating systems.
- Several tail lengths available.
- Operating temperature: 150°C or 200°C.
- 7 contact arrangements (9 to 51 contacts).

IDENTIFICATION CODE

ND2A	2	15	P	BS	P	G	1
------	---	----	---	----	---	---	---

SERIES

ND2A: Nano-D 2-row AXON'.

CONNECTOR TYPE

- 2: Aluminium with electroless nickel plating and epoxy 150°C.
 3: Aluminium with electroless nickel plating and epoxy 200°C.
 Other materials available on request (eg Titanium, Stainless Steel).

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51.

Other versions available on request.

CONNECTOR TYPE

P: Plug connector.

FAMILY

BS: AXON' Vertical PCB connector.

HARDWARE

P: Threaded hole #0-80 UNF (non removable jackposts).
 Other versions available on request.

TAIL PLATING

G: Gold, AWG30.

D: Flash gold plated solid conductor AWG30.
 Other tail plating available on request.

TAIL LENGTH

1: 2.77 mm (0.109").

2: 3.56 mm (0.140").

3: 4.37 mm (0.172").

4: 2.29 mm (0.090").

Tolerance: ± 0.25 mm (0.010").

Connectors are supplied with
 #0-80 UNF screws 1/4" long (for PCB mounting).

Wire for the cable

AXALU® silver plated aluminium conductor, thickness of silver plating is 2um

A Link to datasheet\catalogue here: [axon-space-ESA-Axalu_cg.pdf](#)

AXALU® / aluminium wires

Crosslinked ETFE insulation

Operating temperature: -100°C up to +150°C

Voltage rating: 600 VAC max.

Construction
1 - Stranded silver plated aluminium conductor.
2 - Extruded crosslinked ETFE insulation.

- Main characteristics**
- > 30 to 40 % weight saving compared to equivalent copper wires,
 - > good cut-through resistance,
 - > good resistance to radiation,
 - > good X-Ray response.

AXON' REFERENCE	AWG	CONDUCTOR				SINGLE WIRE MAX. Ø mm	BUNDLE MAX. Ø mm	MAX. WEIGHT g/m
		STRANDING Nb x Ø mm	MAX. Ø mm	NOM. CROSS SECTION mm²	MAX. DC RESISTANCE AT 20°C Ω / km			
AXL 1 M 2419 AS2	24	19x0.12	0.62	0.215	150	0.83	1.66	2.56

Note: it is not Copper Clad Aluminium wire, but if necessary, AXON should be able to source them

Note: wire gauge of the standard catalogue product is 24 AWG, but AXON should be able to custom produce a 30 AWG gauge wire

Note: wires to be made into a custom made cable

Insulation for the wire

Note: insulation of the standard catalogue product is ‘Extruded crosslinked ETFE’ which is not LSZH but they can custom produce the wire with a radiation resistant and LSZH insulation, see below for available wire insulation types.

A link to datasheet\catalogue here: [axorad-radiation-resistant-cables_cg.pdf](#)

Expertise in custom designed products

Based on radiation resistant wires AXORAD AXON' is able to propose hybrid composite round or flat cables as well as terminated harnesses including circular, rectangular, Micro-D, Nano-D or any other type of specific connector. Custom design is AXON's speciality, do not hesitate to contact us.

Radiation resistance, temperature resistance and Halogen free, LSZH behaviour

The standard version is coiled but straight AXOCLAMP® can be delivered on request (reference example AXCL03D).
Minimum quantity: 100 pieces per reference.

‘AXON cable’ capabilities for non-magnetic connectors

Non magnetic connectors |

A standard Micro-D connector made to the requirements of MIL-DTL-83513 contains materials such as austenitic stainless steel, which can easily be magnetized.

To avoid interference from interconnects, Axon' has developed a new product range: non-magnetic Micro-D connectors. (3 levels of performance).

These connectors have limited or no influence on magnetic field lines, improving the reliability of magnetic measurements, even down to nanoTesla level, 10⁻⁴ times lower than the Earth's magnetic field.

Available in PCB and pigtail versions.

GENERAL PERFORMANCES	
RESIDUAL MAGNETIC LEVEL	NMB*: ≤ 200 nT RESIDUAL MAGNETISM LEVEL
	NMC*: ≤ 20 nT RESIDUAL MAGNETISM LEVEL
	NMD* ON REQUEST: ≤ 2 nT RESIDUAL MAGNETISM LEVEL
OPERATING TEMPERATURE RANGE	-55°C / +200°C
CURRENT RATING	3 A MAX

*: NMB, NMC & NMD LEVELS ARE DEFINED BY NASA GSFC S-311 FOR NON-MAGNETIC SUBMINIATURE CONNECTORS AND ADAPTED TO THE DIMENSIONS OF MICRO-MINIATURE CONNECTORS.

GENERAL PERFORMANCES	
Residual Magnetic Level	NMB*: ≤ 200 nT residual magnetism level
	NMC*: ≤ 20 nT residual magnetism level
	NMD* on request: ≤ 2 nT residual magnetism level
Operating temperature range	-55°C / +200°C
Current rating	3 A max

*: NMB, NMC & NMD levels are defined by NASA GSFC S-311 for non-magnetic subminiature connectors and adapted to the dimensions of microminiature connectors.

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 with custom non-magnetic plating or titanium
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating (custom non-magnetic plating)
SOCKET CONTACT	Copper alloy, gold over nickel plating (custom non-magnetic plating)
ENCAPSULANT	Epoxy resin
HARDWARE	Titanium TA6V and beryllium copper
SOLID UNINSULATED WIRES & PCB TERMINALS	AWG 25 Silver Plated Copper

LOWER MAGNETISM LEVEL: Please contact us for a 2 nT residual magnetism level or for other magnetic requirements

Also, non-magnetic plastic connectors

NON-MAGNETIC CONNECTORS

Rectangular Micro-D connectors

IDENTIFICATION CODE

NON-MAGNETIC CONNECTOR

PLASTIC SHELL

- For strong magnetic field environments.
- Minimal magnetic disturbance.
- High performance plastic connector and PTFE wire.
- Environmentally sealed.
- Operating temperature: 125 or 200°C.
- 9 to 51 contacts.

MDN P 51 S 4 L 050 B

Next step

After reviewing the information in this presentation, if you are generally happy with this proposed solution, we can go ahead with contacting AXON and ask them to give us some of their time to see if it is feasible and work out the details.

We could ask

The radiation resistance and magneticity of the assembly components, to see if they meet the requirements

To produce a drawing (with specs) of the cable

To produce a drawing (with specs) of the cable assembly (give an estimated value for the maximum length of the cable assembly)

To produce a quote with likely lead times (give an estimate of the quantity needed)

Buy some samples of their off the catalogue cable assembly and connectors, as a close physical mock up to play with?

From previous AXON email

“Based on previous experience, it could easily take us 2-3 months to come to a final quote”

- Max gauge available (for 0.025" pitch): 30AWG
- A mixture of different gauge wires in the same cable should be possible.
