

Exclusive/Diffraction/Tagging Meeting

Convener Updates/Agenda Items

Jan and Stephen

08/10/2026

- **Latest draft of the ESR** available on [arXiv](#)
 - We checked that all contributors from EDT WG are on the author list
 - Need to add Li and Arjun
 - Please, also check yourselves to make sure we haven't missed anyone
- **New simulation campaign ongoing**
 - Simulations resumed after some issues with computing
 - Files should start appearing soon
- **Tracking work fest** [list of action items](#)
 - Please, have a look and help, if you can with any of the items (link above)
- **Today's updates:**
 - Diffractive DIS in e+p collisions (Antonio)
 - Timelike Compton Scattering Update (Gary)

- **General status:**
 - Overall good shape
 - Style updated to NIM A
 - Stephen edited most of the text
 - Should need only new figures from latest simulation campaign
- **DVMP (J/ψ) production** (Olaiya)
 - AN approved by EDT WG
 - Physics Forum scheduled for August 25th
 - Draft of section in paper in place
- **DVCS** (Oliver)
 - Good progress, recently resolved a couple issues
- **Exclusive Υ** (Georgios)
 - Analysis note under review, comments sent before weekend

Thanks!
Any questions?
