

# RHIC Data and Analysis Preservation Round Table

12/11/25

# Call for a Sample Analysis

- We need one simple RHIC analysis to test (re-)analysis workflows from an external-user perspective (e.g. benchmarking DAP).
- This sample analysis will help validate whether we can (eventually, with AI assistance):
  - interpret the documentation,
  - generate a datasheet,
  - reconstruct the analysis logic,
  - identify missing information, and
  - support or automate steps required for reanalysis and verification.

# Today

1. Updates on SciBot – Atif
  2. Follow-up on Datasheets
- 
- Excuses from Dave M.
  - Next meeting in January 2026
