

## Kong Tu's short bio:

- 2013-2018. PhD, Rice University
- 2018-2021. Goldhaber Fellow, BNL
- 2021- now. Staff Scientist, BNL
- 2025- now. Adjunct Professor, SBU

## Research:

Interested in quantum many-body system and nonperturbative QCD.

- QCD experiments (H1, CMS, [STAR](#), ATHENA, [ePIC](#), CLAS12)
- MC development (BeAGLE )
- QIS phenomenology (spin, entanglement, etc)

*My small group having some group “meetings”.  
Strangely, they love meetings...*

## My advice to early career scientists:

*“Learn how to have fun, both in physics and life, it will get you a looong way in whatever you do.”*
