

Plot approval for INTT chip saturation issue

Shan-Yu Chen, Chia-Ming Kuo, Cheng-Wei Shih
National Central University, Taiwan

#Hits and mean values

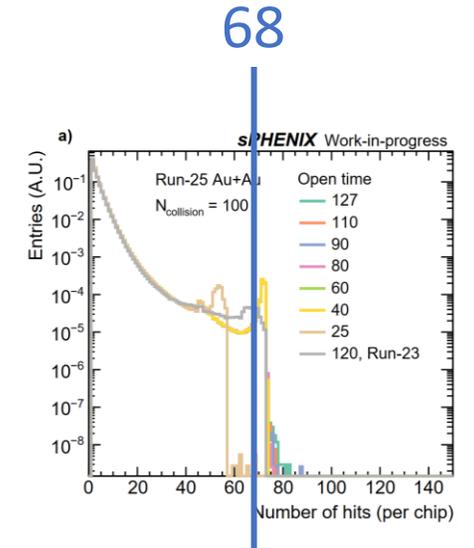

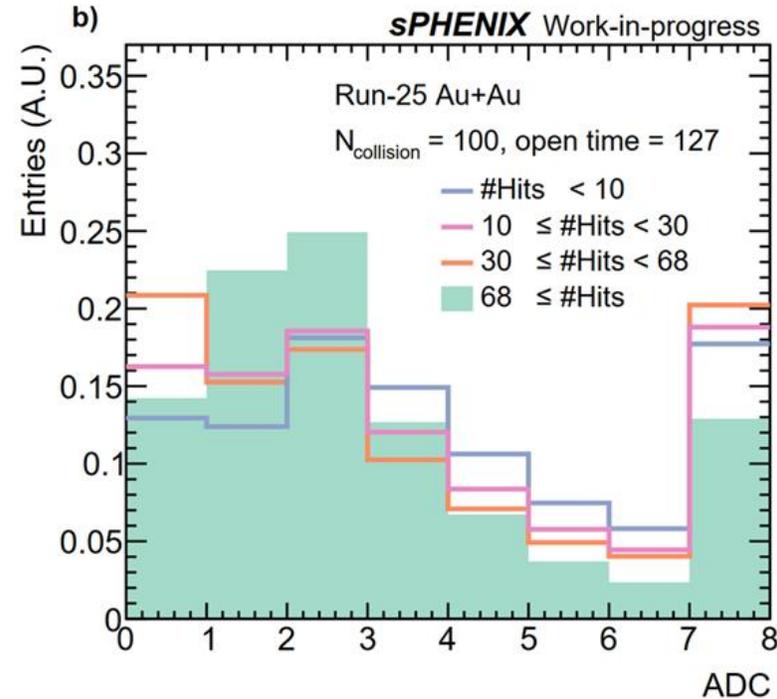

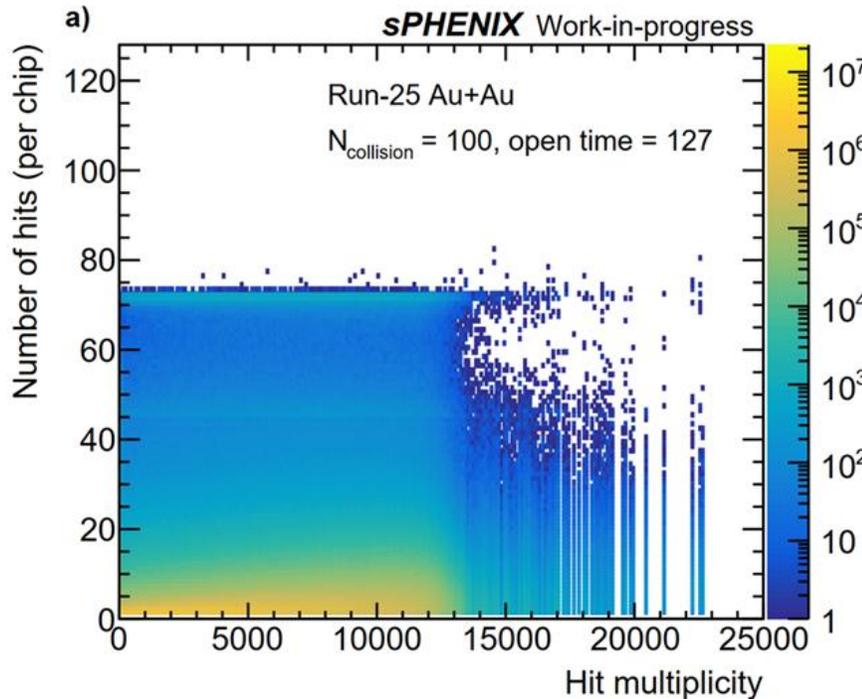

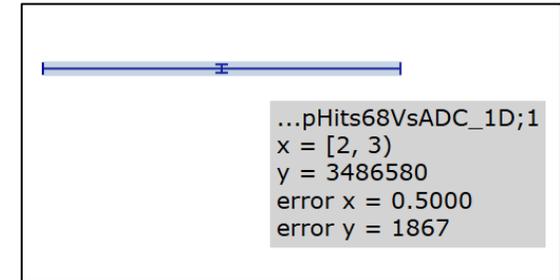

- Remove cluster phi size distribution plot
- Remove 5 min
- Plot only four runs in mean value distribution

Hit multiplicity and ADC

- Add ADC distribution for #Hits < 10, 10 ≤ #Hits < 30, 30 ≤ #Hits < 68
- But the distributions for “normal hits” are not quite similar...

Error: 10^3
Statistic: 10^6

WIP

- TPS in Jan. 13-15, and APR deadline is Jan. 30
- I will use the work-in-progress plots in both TPS and APR because the two dates are close
