Transnational Education Programmes

- Singapore Institute of Technology (SIT):
- 4 Joint Degrees in Engineering and Computing Science
- ~ 400 students/year
- 17 academic staff based in Singapore

- University of Electronic Science and Technology of China (UESTC):
- Double degrees in Engineering
- ~ 660 students/year
- ~ 50 Glasgow-based academic staff

University
of Glasgow

Our city, our partner

The University was founded for the benefit of the city and its people.

Our staff and students are engaged in strong, enduring research and community partnerships to improve health, boost the economy, and build a better future for those living in Glasgow.

The University is a key player in the city's ambitious plans for the regeneration of the River Clyde and in the development of a Glasgow Riverside Innovation District.
