

Request for Input: All testbeams + full-chain readout tests

- Request to summarize all beam tests of ePIC subsystems of past few years. Oskar not sure if he has all of them on file
 - Could DSLs send very brief summary to hartbricho@ornl.gov:
 - Subsystem, year(s), number of weeks, facility (primary or secondary beam line user)
- Request to summarize status and plans for full-chain readout tests of DSCs
 - Latest (and today's) beam test preparation presentations have made a great starting point.
 - Oskar will send separate emails to DSLs
