

# **LFHCal - Impact of New Background**

---

**Friederike Bock (ORNL)**  
**June 1, 2026**

**In short: Unfortunately no reliable update.**

## Why?

- Expertise for full evaluation of simulations for LFHCaI left collaboration w/o disclosing the code to compute resolutions
- Currently trying to recover the code/expertise, but success of scheduled test beams in April/May at PS & SPS took priority
- Additional important obligations of senior people (CERN heavy-ion run) resulted in further delays
- Will return to working on the simulations during the summer with new workforce trying to put these efforts on a broader group of people
