

ePIC Technical Notes / Analysis Notes

- https://www.epic-eic.org/documents/note_process.html

Step 1: Collaborator contacts the Analysis/Technical/Software and Computing Coordination Office with title to receive note number

- Analysis/Technical/Software and Computing Coordination Offices maintain note numbers and list of notes

Step 2: DSC/WG leadership signs off on note

- Work with DSC/WG leadership to identify the most appropriate DSC/WG
- Review should ensure the content of the note follows the standards of the collaboration and the results are accurate
- DSC/WG leadership sends an email to the Analysis/Technical/Software and Computing Coordinators to confirm

Step 3: Collaborator submits to Zenodo

- Use keywords “ana_note” and “tech_note”, along with any other keywords that will make it easy to find the note efficiently. A list of official keywords is available [here](#).

Step 4: Analysis/Technical/Software and Computing Coordinators approve publishing to ePIC

- Analysis and Technical notes will be made available to ePIC Community members
