

Exclusive/Diffraction/Tagging Meeting

Convener Updates/Agenda Items

Jan and Stephen

09/21/2026

- **July campaign status page available:**
 - https://epic-devcloud.org/prod/?user_view=1
- **Request for input on software and simulations**
 - Readiness of simulations for NIM-A paper
 - General requests or suggestions for improvements
 - Let us know about any specific requests/issues **by Tuesday morning**
- **Potential plans for FEMC descoping**
 - Possible 50% reduction of FEMC coverage in early years of ePIC
 - Full acceptance as an upgrade
 - Studies by Oliver how DVCS will be impacted
- **Today's updates:**
 - Coherent J/Psi cross section in e+A collisions (Mathias)
 - Spectator tagging in e+He³

- **New deadline for updated ESR figures: October 10**
 - Latest information from PAC
 - Let us know if you have everything you need to produce those in time

- **General status:**
 - Overall good shape, will review the draft in detail soon
 - Update all figures to the latest version using July simulation campaign
 - Update also in your AN, if possible
 - ***Please, make all changes in the draft by the end of September***
- **Next forum will be on October 6**
 - Please, let us know if you are interested
- **DVMP – J/ψ (Olaiya)**
 - Answers and changes to AN after Physics Forum almost finished
- **Next analyses for Forum?**
 - Let us know if you want to present

Thanks!
Any questions?
