Integrations Overview

Indico-Phonebook

- Indico plugin developed by Vincent Garonne.
- Syncs Indico account categories with user groups in Phonebook.
- Runs on Indico server - we work closely with ITD (Dennis) to deploy on production.

Sympa Publisher

- Originally deployed to OpenShift by Vincent.
- Generates mailing lists for Sympa based on group membership in Phonebook.
- Sympa reads these lists and updates its internal mailing lists.

Upgrades & Improvements

Indico v3.3.8 to v3.3.13 on Oct 3 *(thanks Dennis)*

- Fixes an Indico error that occurred when merging an existing account with a new CILogon request.
 - Prevented ePIC from deploying restricted Indico categories, as some users were unable to authorize.

Indico-Phonebook

- Upgraded to send bearer tokens with Phonebook requests *(previous requests were unauthenticated)*.
 - To be implemented during Oct 3 Indico upgrade.
- Documentation and testing scripts written for future Indico upgrades.

Sympa Publisher *(thanks Rob)*

- Redeployed via OpenShift GitOps continuous deployment system.
- Application state now controlled by repo on SDCC Gitea (SDCC/gitops-public).
