

# USNDP Outreach

A.A. Sonzogni

*National Nuclear Data Center*

During the last NSDD meeting, and taking advantage of Michael Thoennesen being DNP chair, we discussed the possibility of having a table or a booth in the upcoming DNP meeting in Pittsburgh. Several e-mails later and Libby working on the case, we got a **FREE** table at the DNP!

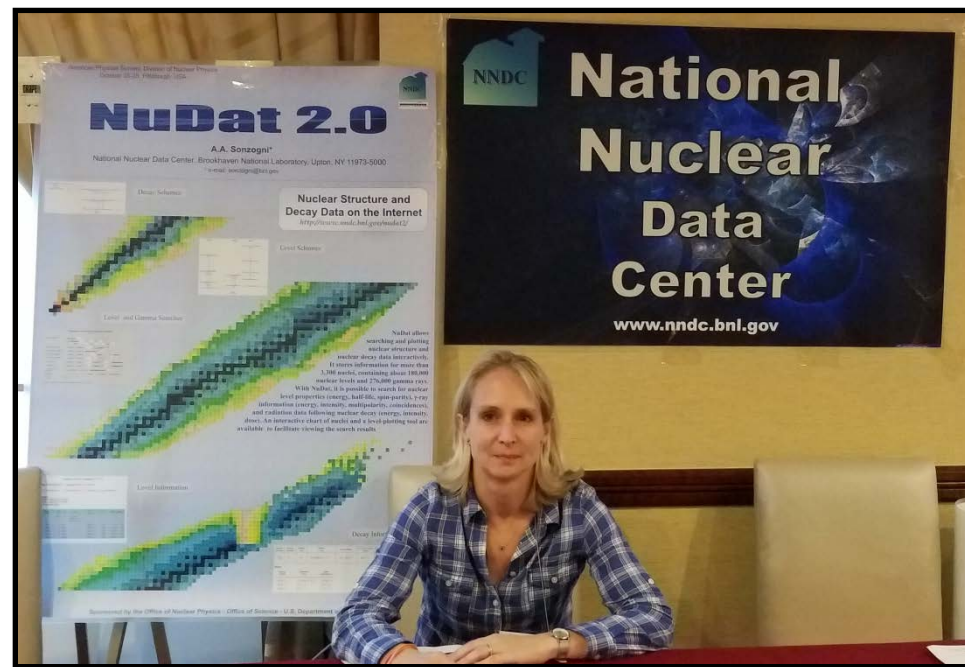

## 2017 DNP meeting, Pittsburgh

We always had one person at the table during the meeting.

Our table was between the APS and LANL booths.

There was plenty of consultations from the attendees and we run out of wallet cards.

In the past, USNDP members attending the APS meeting had plenty of informal interactions with users.

The table gave us a formal venue and we will try to continue with this activity.

We talked to APS about XUNDL collaboration (see Libby's talk).

# Future work.

- New wallet cards will be produced as there is definitely a strong market for it. See Libby's talk for more details.
- We will get Nuclear Data Sheets flyers from Elsevier.
- Planning to have NNDC/USNDP banners, flyers and posters.
- Looking to have talks in 2017 PHYSOR and ANS Winter meeting to promote ENDF/B-VIII.0 library.
