New Shared Resources

Resources

- 20kHS06 / 2.2kCore for now, possibly more
- Running in a general-queue-like mode
  - With much more generous parameters
    - 4Gb Memory Limit
    - 2 day guarantee / 5 day hard time limit
- RHEL7 + Singularity + CVMFS + GPFS + NFS
- SDCC home directories mounted
- Available before the next meeting

Access

- Accessed by flocking
  - CPU_Experiment == "sdcc"
- STAR: technically free to use
  - excluded because STAR scheduler currently requires explicit CPU_Experiments
- PHENIX: awaiting OS upgrade
- Other: free to use
- CSI: will provision an access node
