

Initial Stages 2019

Tuesday, June 25, 2019

Parallel: Approach to Equilibrium - 301 (2:00 PM - 4:00 PM)

-Conveners: Jacquelyn Noronha-Hostler

time	[id] title	presenter
2:00 PM	[M1] Connecting far-from-equilibrium hydrodynamics, resummed transport coefficients, and attractor solutions	NORONHA, Jorge
2:20 PM	[M5] Stochastic hydrodynamics and long time tails of a non-equilibrium fluid	Dr MARTINEZ , Mauricio
2:40 PM	[M9] Self-similarity and spectral functions of non-Abelian plasmas in 2+1D	Dr PEURON, Jarkko
3:00 PM	[M26] Off-equilibrium infrared structure of self-interacting scalar fields: Universal scaling, Vortex-antivortex superfluid dynamics and Bose-Einstein condensation	WANG, Qun
3:20 PM	[M1] Holographic collisions with baryon number at intermediate coupling	VAN DER SCHEE, Wilke
3:40 PM	[M2] Anisotropic hydrodynamics with a realistic collisional kernel	ALMAALOL, Dekrayat
