

# Initial Stages 2019

## Tuesday, 25 June 2019

### **Parallel: Approach to Equilibrium - 301 (14:00 - 16:00)**

-Conveners: Jacquelyn Noronha-Hostler

time	[id] title	presenter
14:00	[81] Connecting far-from-equilibrium hydrodynamics, resummed transport coefficients, and attractor solutions	NORONHA, Jorge
14:20	[35] Stochastic hydrodynamics and long time tails of a non-equilibrium fluid	Dr MARTINEZ , Mauricio
14:40	[49] Self-similarity and spectral functions of non-Abelian plasmas in 2+1D	Dr PEURON, Jarkko
15:00	[126] Off-equilibrium infrared structure of self-interacting scalar fields: Universal scaling, Vortex-antivortex superfluid dynamics and Bose-Einstein condensation	WANG, Qun
15:20	[71] Holographic collisions with baryon number at intermediate coupling	VAN DER SCHEE, Wilke
15:40	[12] Anisotropic hydrodynamics with a realistic collisional kernel	ALMAALOL, Dekrayat
