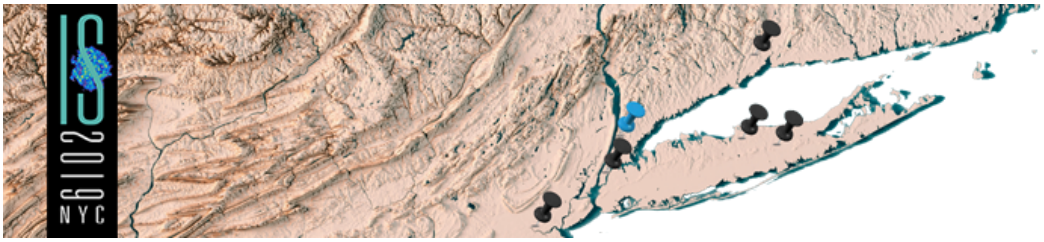
Session Program

Jun 24 – 28, 2019



Initial Stages 2019

Parallel: Initial conditions for hydrodynamics & transport coefficients

Tue, June 25

5:00 PM

Parallel: Initial conditions for hydrodynamics & transport coefficients

Session | **Location:** Pupin, 301 | **Convener:** Adrian Dumitru

5:00 – 5:20 PM

Hydrodynamics far-from-equilibrium: a concrete example in kinetic theory

Speaker
Gabriel Silveira Denicol

Location
Pupin, 301

5:20 – 5:40 PM

Factorization breaking - flow angle and magnitude decorrelation

Speaker
Piotr Bozek

Location
Pupin, 301

5:40 – 6:00 PM

Non-Gaussian fluctuations of v_1, v_2, v_3 and v_4 and their correlations in Pb+Pb collisions with the ATLAS detector

Speaker
Arabinda Behera

6:00 – 6:20 PM

Longitudinal fluctuations and decorrelations of anisotropic flows in relativistic heavy-ion collisions

Speaker
Guang-You Qin

Location
Pupin, 301

6:20 – 6:40 PM

Principal Component Analysis of collective flow in Heavy-Ion collisions

Speaker
ZIMING LIU

Location
Pupin, 301

6:40 – 7:00 PM

New paradigm for fluctuations in heavy-ion collisions

Speaker
Giuliano Giacalone

Location
Pupin, 301

7:00 PM
