

# Photon Results from CDF

*Thursday, 15 August 2013 16:00 (20 minutes)*

The CDF Collaboration continues to analyze the complete, legacy dataset of approximately 10 fb<sup>-1</sup>. This report will cover several recent analyses which feature high-energy photons. QCD hard interactions and proton structure can be probed by comparing measurements of photon cross sections to state-of-the-art calculations. We will report cross section measurements for events with two photons and for events with a photon and heavy-flavor quark. In addition, the latest photon analysis available will be reported.
